REVISED AGENDA MATERIAL for Supplemental Packet 1

Meeting Date: February 25, 2020

Item Number: 23

Item Description: Surveillance Technology Report, Surveillance Acquisition Report, and Surveillance Use Policy for Automatic License Plate Readers, GPS Trackers, and Body Worn Cameras

Submitted by: Councilmember Harrison

Revisions

Revised the following Berkeley Police Department (BPD) proposed Policies 422, Policy 1302 and 1302(a) as follows:

1. Clarified that the intended purpose of ALPR technology is to capture and store digital license plate data and images for parking and scofflaw enforcement, while also recognizing data retained by BPD (limited to positive ALPR hits) may only be used to support specific criminal investigations.
2. Removed blanket provision that reasonable suspicion or probable cause is not required before ALPR use.
3. Removed ALPR crime scene canvass provision and blanket policy of entering plates into the ALPR system in an attempt to identify suspect vehicles.
4. Clarified that it shall be a violation of City policy to share a login with anyone outside of the City of Berkeley, except in cases of disaster or emergency that do not allow time for proper procedures to be followed.
5. Clarified that unauthorized access or data breaches shall be reported immediately to the City Manager.

6. Consistent with the Surveillance Ordinance BMC 2.99.020 (2) (a), clarified that third-party data-sharing shall be subject to non-privileged and non-confidential City Council notification.

Rationale

Proposed Policies 1302 and 422 inappropriately expand the scope of permitted deployments of Automated License Plate Readers (ALPR) to “support criminal investigations” and “canvass license plates around any crime scene.” Both policies instruct officers that “[p]artial license plates reported during major crimes should be entered into the ALPR system in any attempt to identify suspect vehicles.”¹

Council has neither given policy nor budgetary approval for such proposed ALPR uses and therefore the Resolution as proposed by staff should not be accepted without revision.

The proposed BPD Policies 1302 and 422 are inconsistent with the scope of the following effective Council and BPD policies regarding ALPR:

1. *Resolution No. 68,085-N.S.*

- Resolution No. 68,085-N.S. authorizes the collection of ALPR data for a single use: anonymized parking data supporting the goBerkeley parking program.

2. July 11, 2017 City Council Annotated Agenda

- The Annotated Agenda notes Council direction to the City Manager to amend Section 7.f of General Administrative Order #0001-2016 to defer any release of data until the surveillance policy and ordinance are adopted. To date, the City Manager has not amended Order #0001-2016.

3. *BPD General Administrative Order #001-2016*

- Section 1 of the effective BPD General Administrative Order #001-2016 specifies that only the BPD Parking Enforcement and Traffic Units may use ALPRs.
- Section 9 specifies further that “parking and scofflaw enforcement” are the only permitted use and deployment for ALPR technology in the City of Berkeley.

4. *Contract No. 9977*

- The scope of Contract No. 9977 is limited to the purchase of ALPR units in service of parking enforcement activities.

~~(c) While an ALPR may be used to canvass license plates around any crime scene, particular consideration should be given to using ALPR-equipped vehicles to canvass areas around homicides, shootings and other major incidents. Partial license plates reported during major crimes should be entered into the ALPR system in an attempt to identify suspect vehicles.~~

No member of this department shall operate ALPR equipment or access ALPR data without first completing department-approved training.

No ALPR operator may access California Law Enforcement Telecommunications System

(CLETS) data unless otherwise authorized to do so. If practicable, the officer should verify an ALPR response through the California Law Enforcement Telecommunications System (CLETS) before taking enforcement action that is based solely on an ALPR alert.

422.5 DATA COLLECTION AND RETENTION

All ALPR data downloaded to the server should be stored for a minimum of one year (Government Code § 34090.6) and in accordance with the established records retention schedule. Thereafter, ALPR data should be purged unless it has become, or it is reasonable to believe it will become, evidence in a criminal or civil action or is subject to a lawful action to produce records. In those circumstances the applicable data should be downloaded from the server onto portable media and booked into evidence.

(a) Collected images and metadata of reads showing violations will not be stored for more than 365 days.

(b) Metadata of reads showing violations will be stored for up to 30 days. Images of reads not showing violations will not be transferred to the server.

422.6 ACCOUNTABILITY

PROPOSED D4 AMENDMENTS

All saved data will be safeguarded and protected by both procedural and technological means. The Berkeley Police Department will observe the following safeguards regarding access to and use of stored data (Civil Code§ 1798.90.51; Civil Code§ 1798.90.53):

- (a) Non-law enforcement requests for access to stored ALPR data shall be processed according to the Records Maintenance and Release Policy in accordance with applicable law.
- (b) Non-law enforcement requests for information regarding a specific vehicle's license plate may be honored when the requester is the registered owner of the vehicle in question, and when providing such information will not invade the privacy of a third party. The requestor in such cases must provide acceptable proof of his or her identity and of ownership of the vehicle in question.
- (c) All ALPR data downloaded to any workstation or server shall be accessible only through a login/password-protected system capable of documenting all access of information by name, date and time (Civil Code§ 1798.90.52). It shall be a violation of this policy to share a login with anyone outside of the City of Berkeley, except in cases of disaster or emergency that do not allow time for proper procedures to be followed.
- (d) Berkeley Police Department members approved to access ALPR data under these guidelines are permitted to access the data for legitimate law enforcement purposes only, such as when the data relate to a specific criminal investigation or department-related civil or administrative action or parking enforcement.
- (e) Aggregated ALPR data not related to specific criminal investigations shall not be released to any local, state or federal agency or entity without the express written consent of the City Manager.
- (f) Measures will be taken to ensure the accuracy of ALPR information. Errors discovered in ALPR data collected by ALPR units shall be marked, corrected or deleted in accordance with the type and severity of the error in question.
- (g) ALPR system audits will be conducted by the Professional Standards Bureau's Audit and Inspections Sergeant on a regular basis, at least biannually. For security or data breaches, see the Records Release and Maintenance Policy. Any unauthorized access or data breach shall be reported immediately to the City Manager.

422.7 RELEASING ALPR DATA

The ALPR data may be shared only with other law enforcement or prosecutorial agencies for official law enforcement purposes or as otherwise permitted by law, using the following procedures:

- (a) The agency makes a written request for the ALPR data that includes:
 1. The name of the agency.
 2. The name of the person requesting.
 3. The intended purpose of obtaining the information.
 4. The related case number.

PROPOSED D4 AMENDMENTS

(b) The request is reviewed by the Investigations Division Captain, or his/her designee, and approved before the request is fulfilled.

(c) The approved request is retained on file. Requests for ALPR data by non-law enforcement or non-prosecutorial agencies will be processed as provided in the Records Maintenance and Release Policy (Civil Code § 1798.90.55).

ALPR data is subject to the provisions of the Berkeley Police Department's Immigration Law Policy, and hence may not be shared with federal immigration enforcement officials.

[Third-party data-sharing shall be subject to non-privileged and non-confidential City Council notification pursuant to BMC 2.99.020 \(2\) \(a\).](#)

422.8 SCOFFLAW ENFORCEMENT

The Berkeley Police Department uses ALPR technology in the Parking Enforcement Unit for parking and scofflaw enforcement.

The Parking Enforcement Unit will utilize vehicles equipped with ALPR units to conduct enforcement of posted time limits in commercial areas and Residential Preferential Parking (RPP) permit areas. These ALPR's will also access information in the DMV's Stolen Vehicle System (SVS) database for wanted and stolen vehicles.

The Scofflaw Enforcement program (often referred to as the "booting" program) utilizes an ALPR to scan license plates and check the scanned "reads" against a list of vehicles which have five or more outstanding parking citations exceeding 30 days old. Typically, upon a confirmed "hit," the vehicle is immobilized with a "boot", or towed, and the owner has to pay the outstanding citations and fees in order to release the boot and/or recover their car from storage. This allows the City to recover outstanding citation fees.

The contracted vendor for the City's Scofflaw Enforcement program is currently Paylock. Paylock stores data on a secure server, and provides access to authorized personnel via Paylock's "Bootview" secure website.

When a car is booted and/or towed, the read, hit and photographic data relating to the booting and/or towing of scofflaw vehicles is uploaded to Paylock's secure server. No other data is uploaded to Paylock's secure server.

The City's Parking Enforcement ALPR vendor (currently Genetec) will periodically provide reports to the City of Berkeley Transportation Division's "goBerkeley" parking management program so that it can analyze data about parking demand. These reports will not contain any information about a vehicle's license plate number, the name of the registered owner, address of registered owner, or any other information gleaned from the license plate number associated with a particular vehicle. Rather, the reports will consist of 100 percent anonymized information using identification numbers that are not associated with a particular license plate or registered owner.

The reports will provide only the date, time, location, approximate address, "go Berkeley" blockface ID, and RPP area in which a vehicle was observed. If a citation was not issued for an RPP or other time limit

PROPOSED D4 AMENDMENTS

violation, the report may also provide the reason a parking enforcement officer concluded there was no parking violation, e.g., RPP visitor pass, disabled placard or license plate, etc.

PROPOSED D4 AMENDMENTS

The procedures described within this policy (Data Access, Data Protection, Data Retention, Public Access and Third Party Data Sharing) protect against the unauthorized use of ALPR data. These policies ensure the data is not used in a way that would violate or infringe upon anyone's civil rights and/or liberties, including but not limited to potentially disparate or adverse impacts on any communities or groups.

1302.7 DATA RETENTION

The Investigations Division Captain, or his/her designee, is responsible for ensuring proper collection and retention of ALPR data. Technical support and assistance shall be provided by the

PROPOSED D4 AMENDMENTS

1302 APPENDIX A

BERKELEY POLICE DEPARTMENT SURVEILLANCE ACQUISITION REPORT-AUTOMATED LICENSE PLATE READER DEVICES

AUTOMATED LICENSE PLATE READER (ALPR) DEVICES

Automated License Plate Readers (ALPRs) are high-speed, computer controlled camera systems that are typically mounted on Berkeley Police Department Parking Enforcement

Vehicles.

ALPRs capture license plate numbers which come into view, along with the location, date and time. The data, which includes a photo of the front or the back of the car displaying the license plate, is then uploaded to a central server.

B. PURPOSE

The Berkeley Police Department's Parking Enforcement Unit utilizes vehicles equipped with ALPRs to conduct enforcement of posted time limits in commercial areas and Residential Preferential Parking (RPP) permit areas. These ALPR's also access information in the California Law Enforcement Telecommunications System's (CLETS) Stolen Vehicle System (SVS) database, which provides information on matches for stolen and wanted vehicles.

The Berkeley Police Department's Scofflaw Enforcement program (often referred to as the "booting" program) utilizes an ALPR to scan license plates, and check the scanned "reads" against a list of vehicles which have five or more outstanding parking citations exceeding 30 days old. Typically, upon a confirmed "hit," the vehicle is immobilized with a "boot", or towed, and the owner has to pay the outstanding citations and fees in order to release the boot and/or recover their car from storage. This allows the City to recover outstanding parking citation fees.

C. LOCATION

Parking Enforcement vehicles travel throughout the city; using the ALPRs as described above.

D. IMPACT

The Berkeley Police Department is dedicated to promoting public safety with the most efficient utilization of its resources and services in its public safety endeavors. The Berkeley Police Department recognizes the need to protect its ownership and control over shared information and to protect the privacy and civil liberties of the public, in accordance with federal and state law. The procedures utilized with ALPR Units will help to ensure unauthorized use of its data. The procedures will ensure the data is not used in a way that would violate or infringe upon anyone's civil rights and/or liberties, including but not limited to potentially disparate or adverse impacts on any communities or groups.

E. MITIGATION

All saved data will be safeguarded and protected by both procedural and technological means which are implemented to safeguard the public from any impacts identified in subsection (D).

PROPOSED D4 AMENDMENTS

See subsection (G) for further.

F. DATA TYPES AND SOURCES

Photographs of license plates and location data may be obtained through the use of ALPR Units.

G. DATA SECURITY

The Berkeley Police Department will observe the following safeguards regarding access to and use of stored data (Civil Code§ 1798.90.51; Civil Code§ 1798.90.53):

1. All ALPR data downloaded to any workstation or server shall be accessible only through a login/password-protected system capable of documenting all access of information by name, date and time (Civil Code§ 1798.90.52). It shall be a violation of this policy to share a login with anyone outside of the Berkeley Police Department, except in case of disaster or emergency that does not allow time for proper procedures to be followed.
2. Berkeley Police Department members approved to access ALPR data under these guidelines are permitted to access the data for legitimate law enforcement purposes only, such as when the data relate to a specific criminal investigation or department related civil or administrative action and parking enforcement.
3. Aggregated ALPR data not related to specific criminal investigations shall not be released to any local, state or federal agency or entity without the express written consent of the City Manager.
4. Measures will be taken to ensure the accuracy of ALPR information. Errors discovered in ALPR data collected by ALPR units shall be marked, corrected or deleted in accordance with the type and severity of the error in question.

H. FISCAL COST

In 2015, Public Works brought an ALPR Contract to City Council. Council approved a contract for Public Works to buy five Genetec ALPR Units with PCS Mobile communication, for a pilot program for \$450,000.

In 2017, after success with the program, City Council approved an amendment to the contract, allowing Public Works to purchase 15 more ALPR Units for Parking Enforcement vehicles, and to continue its use of PCS Mobile, for 1,200,000. The money was allocated from the goBerkeley/Federal Highway Administration Parking Meter Fund.

Yearly service for the ALPR Units includes warranties, hosting services, cellular connection, mobile computing, and training which varies. The costs through fiscal year 2022 are currently estimated at \$1,175,000.

Personnel costs are minimal in that the ALPR Units are used as a resource during normal working hours.

I. THIRD PARTY DEPENDENCE AND ACCESS

1. Vendor Access-Scofflaw Enforcement: The contracted vendor for the City's Scofflaw Enforcement program is currently Paylock. Paylock stores data on a secure server, and provides access to authorized personnel via Paylock's "Bootview" secure website, as described below:

PROPOSED D4 AMENDMENTS

a. All data captured by the ALPR is stored on the booting vehicle's laptop for 30 days, and is only accessible during that period via the ALPR proprietary software. This includes reads, hits, and photographs associated with each.

b. When a car is booted and/or towed, the read, hit and photographic data relating to the booting and/or towing of scofflaw vehicles is uploaded to Paylock's secure server. No other data is uploaded to Paylock's secure server.

2. Vendor Access-General Parking Enforcement and goBerkeley Program: The contracted vendor for the City's Parking Enforcement ALPR is currently Genetec. The city uses Genetec ALPRs to support efficient enforcement of posted time limit parking and Residential Preferential Parking permits.

a. In addition, Genetec periodically provides reports to the City of Berkeley Transportation Division's "goBerkeley" parking management program so that the City's program can analyze data about parking demand. These reports do not contain any information about a vehicle's license plate number, the name of the registered owner, address of registered owner, or any other information gleaned from the license plate number associated with a particular vehicle.

Rather, the reports consist of completely anonymized information, using identification numbers that are not associated with a particular license plate or registered owner.

b. The reports will provide only the date, time, location, approximate address, "goBerkeley" blockface ID, and Residential Permit Pass (RPP) area in which a vehicle was observed. If a citation was not issued for an RPP or other time limit violation, the report may also provide the reason a parking enforcement officer concluded there was no parking violation, e.g., RPP visitor pass, disabled placard or license plate, etc.

3. Department of Information Technology Access: Technical support and assistance for ALPR's is provided by the City of Berkeley's Department of Information Technology (IT) and associated ALPR system providers/vendors as identified herein. IT staff who do not have the proper clearance and training do not have the ability to access or view individual records or reports, as they may contain CLETS information they are not authorized to receive. IT provides initial infrastructure set-up, and continued systems support as needed to ensure efficient and accurate performance of the ALPR hardware and software. Only IT staff members who have successfully undergone DOJ background checks and training are authorized by the Chief of Police to view specific ALPR records.

4. Other Law Enforcement Agency Access: ALPR data may only be shared with other law enforcement or prosecutorial agencies for official law enforcement purposes or as otherwise permitted by law. Requests for ALPR data by non-law enforcement or nonprosecutorial agencies will be processed as provided in the Records Maintenance and

Release Policy (Civil Code§ 1798.90.55). Aggregated ALPR data not related to specific criminal investigations shall not be released to any local, state or federal agency or entity without the express written consent of the City Manager.

5. Member Access: No member of this department shall operate ALPR equipment or access ALPR data without first completing department-approved training. No ALPR operator may access CLETS data unless

PROPOSED D4 AMENDMENTS

otherwise authorized to do so. If practicable, the officer should verify an ALPR response through CLETS before taking enforcement action that is based solely on an ALPR alert.

6. Public Access: Non-law enforcement requests for access to stored ALPR data shall be processed according to the Records Maintenance and Release Policy in accordance with applicable law. Non-law enforcement requests for information regarding a specific vehicle's license plate may be honored when the requester is the registered owner of the vehicle in question, and when providing such information will not invade the privacy of a third party. The requestor in such cases must provide acceptable proof of his or her identity and of ownership of the vehicle in question.

[7. Third-party data-sharing is subject to non-privileged and non-confidential City Council notification pursuant to BMC 2.99.020 \(2\) \(a\).](#)

J. ALTERNATIVES

None.

K. EXPERIENCE OF OTHER ENTITIES

The use of ALPR technology is common amongst law enforcement agencies throughout the country, in support of parking enforcement, and law enforcement criminal investigations.

M/S/C (Arreguin/Davila) to refer to the City Manager, Planning Commission, Zoning Adjustments Board, and Design Review Committee to consider the following actions, and others they may find appropriate, to address the potential impacts of the Housing Accountability Act and to preserve local land use discretion:

1. Amend the General Plan and Zoning Ordinance to adopt numerical density and/or building intensity standards that can be applied on a parcel-by-parcel basis in an easy and predictable manner. 2. Devise and adopt “objective, identified written public health or safety standards” applicable to new housing development projects.
3. Adopt “design review standards that are part of ‘applicable, objective general plan and zoning standards and criteria’”.
4. Quantify and set objective zooming standards and criteria under the first sentence of Government Code Section 65589.5(j) for views, shadows, and other impacts that often underlie detriment findings.

Vote: Ayes – Bartlett, Hahn; Noes – Davila, Harrison; Abstain – Maio, Wengraf, Worthington, Droste, Arreguin.

Action Calendar – Old Business

Action: M/S/C (Harrison/Maio) to adopt the proposal from Councilmember Harrison in Supplemental Reports Packet #2 amended to include paragraph #3 from Councilmember Hahn's proposal.

Direct staff to prioritize local growers and cooperatives in the permitting process or set aside some of the allotted square footage specifically for use by local small growers and cooperatives. This could be achieved by maintaining the limit of 6 cultivation locations between 15,000 and 22,000 ft² in size for all forms of cultivators (using between 90,000 and 132,000 of the available 180,000 ft²) while allocating the remaining 48,000 ft² to local cultivators and cooperatives, without a specific location limit. During the permitting process, each operator will be limited to one site to avoid anti-competitive practices and prevent a monopoly. After one year of operation, staff will evaluate the positive and negative impacts of the cultivation site on the surrounding businesses and neighbors, and enforce on a complaint-driven basis

#3 Hahn: To allow only 1 site per operator, and create an overall preference for qualified owners from populations or groups that are or have been disproportionately targeted for enforcement, criminalization, and/or incarceration related to marijuana offenses;

Vote: Ayes – Maio, Davila, Bartlett, Harrison, Wengraf, Worthington, Droste, Arreguin; Noes – None; Abstain – Hahn.

Action: M/S/Failed (Droste/Wengraf) to adjourn the meeting.

36. **Analysis and Recommendations for the Pathways Project to Address Homelessness in Berkeley** *(Continued from June 27, 2017. Item contains supplemental materials.)*

From: City Manager

Recommendation: Prioritize funding decisions for proposed Pathways Project programs (an Encampment Resolution Team, a STAIR Center, a Bridge Living Community, and a Homeward Bound program) based on which homeless issue Council most wishes to address in Berkeley:

1. Fund an Encampment Resolution Team and a STAIR Center for an estimated \$2.4 million in year one, plus \$2.1 million annually thereafter, if Council most wishes to provide temporary respite for unsheltered homeless individuals with no dedicated housing exits.
2. Fund a Bridge Living Community and a Homeward Bound program for an estimated \$2.6 million in year one, plus \$2.4 million annually thereafter, if Council most wishes to house an estimated 100-120 homeless individuals per year, but add no new emergency respite programs.
3. Fund all four programs at an estimated \$4.8 million in year one, and an estimated \$4.3 million annually thereafter, if Council wishes to address both the goal of temporary respite and permanent housing concurrently.

All funding estimates include roughly \$190,000 for 1 FTE in new City Staff time for program administration.

The City Manager recommends prioritizing a Bridge Living Community and associated rental subsidies and a Homeward Bound program.

DEPARTMENT ORDER

ADMINISTRATIVE ORDER #001-2016

DATE ISSUED: 02/18/16

SUBJECT: AUTOMATED LICENSE PLATE READER (ALPR)

PURPOSE

- 1 - This order establishes guidelines for the use of the Berkeley Police Department's Automated License Plate Reader (ALPR) technology and data. ALPR technology functions by automatically capturing an image of a vehicle's license plate, transforming that image into alphanumeric characters using optical character recognition software, and storing that information, along with relevant metadata (e.g. geo-location and temporal information, as well as data about the ALPR). ALPRs may be used by the Berkeley Police Department Parking Enforcement and Traffic Units for official law enforcement purposes.

POLICY

Administration of ALPR Data

- 2- Any installation and maintenance of ALPR equipment, as well as ALPR data retention and access, shall be managed by the Investigations Division Captain through the Traffic Bureau. The Investigations Division Captain will assign personnel under his/her command to administer the day-to-day operation of the ALPR equipment and data.

ALPR Operation

- 3- Department personnel shall not use, or allow others to use, the ALPR equipment or database records for any unauthorized purpose.
 - a. An ALPR shall only be used for official and legitimate law enforcement business.
 - b. Reasonable suspicion or probable cause is not required before using an ALPR.
 - c. No member of this department shall operate ALPR equipment or access ALPR data without first completing department-approved training.
 - d. No ALPR operator may access California Law Enforcement Telecommunications System (CLETS) data unless otherwise authorized to do so.

DEPARTMENT ORDER

ADMINISTRATIVE ORDER #001-2016

DATE ISSUED: 02/18/16

ALPR Data Collection and Retention

- 4- All data and images gathered by an ALPR are for the official use of the Berkeley Police Department. Such data may contain confidential CLETS information and is not open to public review. ALPR information gathered and retained by this department may be used and shared with prosecutors or other law enforcement agencies only as permitted by law.
- 5- The Parking Enforcement Manager is responsible for ensuring proper collection and retention of ALPR data. Technical support and assistance shall be provided by City Department of Information Technology personnel and associated ALPR system providers/vendors as identified below. IT staff will not have the ability to access or view individual records or reports, as they may contain CLETS information they are not authorized to receive. IT's role will be limited to providing initial infrastructure set-up, unless particular IT staff members have been cleared by DOJ background checks and authorized by the Chief of Police to receive ALPR records.
- 6- All ALPR data shall be stored as described in this order and thereafter shall be purged unless it has become, or it is reasonable to believe it will become, evidence in a criminal or civil action or is subject to a lawful action to produce records. In those circumstances the applicable data shall be downloaded from the server onto portable media and booked into evidence. The records will then be subject to standard evidence retention policies and statutes.
 - a. Collected images and metadata of hits will not be stored for more than 365 days. Metadata of reads will not be stored for more than 30 days. Images of reads will not be transferred to the server.

Accountability and Safeguards

- 7- All saved data will be safeguarded and protected by both procedural and technological means. The Berkeley Police Department will observe the following safeguards regarding access to and use of stored data:
 - a. Non-law enforcement requests for access to stored ALPR data shall be processed according to General Order R-23 in accordance with applicable law.
 - b. Non-law enforcement requests for information regarding a specific vehicle's license plate may be honored when the requestor is the registered owner of the vehicle in question, and when providing such

DEPARTMENTAL ORDER

ADMINISTRATIVE ORDER #001-2016

DATE ISSUED: 02/18/16

information will not invade the privacy of a third party. The requestor in such cases must provide acceptable proof of his or her identity and of ownership of the vehicle in question.

- c. ALPR data downloaded to any workstation or server shall be accessible only through a login/password-protected system capable of documenting all access of information by name, date and time.
- d. Berkeley Police personnel approved to access ALPR data under these guidelines are permitted to access the data for legitimate law enforcement purposes only, such as when the data relates to a specific criminal investigation or department-related civil or administrative action and parking enforcement.
- e. ALPR data may be released to other authorized and verified law enforcement officials and agencies for legitimate law enforcement purposes only in connection with specific criminal investigations.
- f. Aggregated ALPR data not related to specific criminal investigations shall not be released to any local, state, or federal agency or entity without the express written consent of the City Manager.
- g. Measures will be taken to ensure the accuracy of ALPR information. Errors discovered in ALPR data collected by ALPR units are marked, corrected, or deleted in accordance with the type and severity of the error in question.
- h. ALPR system audits will be conducted by personnel assigned to the Professional Standards Bureau on a regular basis, at least biennially.

Current ALPR Deployments

- 9- The Berkeley Police Department uses ALPR technology in the Parking Enforcement Unit for parking and scofflaw enforcement.
- 10- Effective 2/18/16, the Parking Enforcement Unit will utilize five (5) Parking Enforcement Go-4 vehicles equipped with ALPR units to conduct enforcement of posted time limits in commercial areas and Residential Preferential Parking (RPP) permit areas. These ALPR's will also access information in the DMV/SVS database (stolen and wanted vehicles). The

DEPARTMENTAL ORDER

ADMINISTRATIVE ORDER #001-2016

DATE ISSUED: 02/18/16

current contracted vendor for this system is PCS Mobile using Genetec ALPR technology.

- 11- The Scofflaw Enforcement program (often referred to as the "booting" program) utilizes an ALPR to scan license plates, and checks scanned "reads" against a file of vehicles which have five or more outstanding parking citations exceeding 30-days old. Typically, upon a confirmed "hit," the vehicle is immobilized with a "boot", or towed, and the owner has to pay the outstanding citations and fees in order to release the boot and/or recover their car from storage. This allows the city to recover outstanding citation fees and penalties. ALPR equipment is installed in the Parking Enforcement Unit's Scofflaw Enforcement vehicle.
- 12- The contracted vendor for the City's Scofflaw Enforcement program is currently Paylock. Paylock stores data on a secure server, and provides access to authorized personnel via Paylock's "Bootview" secure website, as described below:
 - a. All data captured by the ALPR is stored on the laptop for 30 days, and is only accessible during that period via the ALPR proprietary software. This includes reads, hits, and photographs associated with each.
- 13- When a car is booted and/or towed, the read, hit, and photographic data relating to the booting and/or towing of scofflaw vehicles is uploaded to Paylock's secure server. No other data is uploaded to Paylock's secure server.
- 14- The City's Parking Enforcement ALPR vendor (currently Genetec) will periodically provide reports to the City of Berkeley Transportation Division's goBerkeley parking management program so that it can analyze data about parking demand. These reports will not contain any information about a vehicle's license plate number, the name of the registered owner, address of registered owner, or any other information gleaned from the license plate number associated with a particular vehicle. Rather, the reports will consist of 100 percent anonymized information using identification numbers that are not associated with a particular license plate or registered owner. The reports will provide only the date, time, location, approximate address, goBerkeley blockface ID, and RPP area in which a vehicle was observed. If a citation was not issued for an RPP or other time limit violation, the report may also provide the reason a parking enforcement

officer concluded there was no parking violation, e.g., RPP visitor pass, disabled placard or license plate, etc.

3.5.2 Technical Appointments

Customers with a valid SMA may schedule technical appointments with a Genetec Technical Support Engineer. Technical appointments may be used to discuss system design, plan a system upgrade, assist during a system upgrade or used for any other product-related technical work.

Technical appointments can be booked on the GTAP. Technical appointments must be scheduled during regular GTAC hours but are also available after hours, if needed, at an extra cost.

5 Pricing & Ordering

5.1 SMAs

5.1.1 SMA Pricing Structure

SMAs are assembled in a similar fashion to Genetec software licenses, meaning that it's composed of a base package (for either an SMA or an SMA Plus) and a number of options depending on the system(s) covered by the SMA in question.

It is important to note that not all software license options have a corresponding SMA line item; in fact very few license options have that. If we take the example of Omnicast, only camera connection licenses are counted when pricing an SMA, all other license options/connections are SMA-free. It is therefore very simple to quickly assemble an SMA quote with just a few line items.

Since the difference between the SMA and the SMA Plus is taken into account in the SMA base package, all other line items that form the SMA are the same regardless what type of SMA has been selected.

5.1.2 SMA Multi-Year Discount

Genetec offers multi-year SMA terms in the form of a 2-year, 3-year, 4-year or 5-year agreement. All SMA line items have their respective multi-year counterparts that are used for ordering a multi-year SMA.

Since these multi-year SMAs represent a long term commitment to Genetec, an additional discount is factored in all multi-year SMA line items. In order to benefit from this multi-year discount, the full amount for a multi-year SMA must be paid in full at the time of purchase or renewal.

5.1.3 Multi System/Site SMA

An SMA can cover multiple System IDs, therefore an **end-user** with multiple system can consolidate all his systems under a single SMA for added simplicity. Since there's effectively only one SMA in this scenario, the end-user will only pay for the SMA base package once for the entire SMA and **NOT** once for every System ID covered by the SMA, therefore benefiting from a volume discount for placing all of his Genetec systems under a unique SMA.

It is important to note that a reseller **CANNOT** place multiple System IDs from multiple end-users under a single SMA.

5.1.4 SMAs for License Add-ons

An SMA is mandatory for all add-ons done to an existing system that is currently under SMA. However, this applies only to software options for which Genetec charges an SMA for (Cameras, Readers, Sharps and Patrollers).

When adding a software license option that has a corresponding SMA line item, the SMA price for that add-on must be pro-rated to co-terminate with the SMA's anniversary date. This is accomplished by using a series of "1 day" SMA part numbers that are created solely to facilitate the pro-rating calculation.

In order to compute the price, simply take the appropriate SMA 1 day part number associated to the license option that is being added to the system, multiply that by the quantity of license options ordered and then multiply that again by the number of days remaining in the SMA term. Information on an SMA's anniversary date and remaining days in the agreement is readily accessible through the system management section of the GTAP.

5.1.5 SMA Renewals

Renewal notices are automatically sent 90 days and 45 days prior to the anniversary date of the SMA, indicating that the SMA is about to expire. In the eventuality that the SMA is not renewed by the anniversary date, an additional notice is sent advising of the expiration of the SMA.

SMA coverage must be continuous. For example, if year two is skipped and an SMA is desired for year three, the cost of the SMA will be retroactive to include the year that was skipped, thus will cover both the second and third year.

All SMA renewals are priced according to the most recent price list in effect at the time of the renewal.

5.1.6 SMA Ordering Information

SMAs must be purchased together with a new system sale or in conjunction with a system upgrade. If an SMA is purchased as an add-on to an existing system, it will be priced retroactively as if it was purchased at the same time as the system it will cover.

To order an SMA, the base package must be selected first for either an SMA or an SMA PLUS by using the following line items:

SMA-BASE-XX or SMA-PLUS-XX

Once the SMA base package has been selected, the other SMA line items are chosen based on the content of the licenses that the SMA covers. The format for all SMA part numbers follows the following standard:

SMA-0000-E-XX or SMA-0000-XX

Where:

OOO: License option reference: CAM (Camera Connection), RDR (Reader Connection), SHP (AutoVu Sharp Connection), PATR (AutoVu Patroller System), UNIV (AutoVu University System), CITY (AutoVu City System) and MLPI (AutoVu MLPI System)

E: Edition of the software if applicable: S (Standard), P (Pro), E (Enterprise)

XX: The term of the SMA: 1Y, 2Y, 3Y, 4Y, 5Y and 1D.

Complete SMA pricing information is found in the SMA price list.

5.1.7 SMA Quoting Examples

a) Example 1: Unified Video/ACS SC5 System

Customer purchases a unified Video/ACS SC5 system. He purchased the Enterprise version of Synergis with 50 Readers, the Pro version of Omnicast with 75 Camera, has 2 Sharp Cameras and requires a 3 year SMA.

The parts required to assemble this SMA would be as follows:

Part No	Description	Qty
SMA-BASE-3Y	SMA Base Package – 3 years	1
SMA-CAM-P-3Y	SMA for 1 Omnicast Pro Camera – 3 years	75
SMA-RDR-E-3Y	SMA for 1 Synergis Enterprise Reader – 3 years	50
SMA-SHP-3Y	SMA for 1 Sharp Camera – 3 years	2

b) Example 2: Multiple Systems with a Single SMA

Customer has an extensive multi-site deployment with federation, with both Video and ACS.

Customer requires a 1 year agreement with round the clock access to Technical Support and has the following sites to deploy:

Site	Video	Access Control
Site A	Omnicast Enterprise 350 cams	Synergis Enterprise 40 readers
Site B	Omnicast Enterprise 120 cams	Synergis Enterprise 25 readers
Site C	Omnicast Pro 60 cams	Synergis Enterprise 10 readers
Site D	Omnicast Standard 15cams	Synergis Enterprise 5 readers
Site E	Omnicast Standard 15cams	Synergis Enterprise 5 readers

To summarize, the customer has 470 Omnicast Enterprise cameras, 60 Omnicast Pro cameras, 30 Omnicast Standard cameras and 85 Synergis Enterprise readers. The parts required to assemble this SMA would be as follows:

Part No	Description	Qty
SMA-PLUS-1Y	SMA Plus Base Package – 1 year	1
SMA-CAM-S-1Y	SMA for 1 Omnicast Standard Camera – 1 year	30
SMA-CAM-P-1Y	SMA for 1 Omnicast Pro Camera – 1 year	60
SMA-CAM-E-1Y	SMA for 1 Omnicast Enterprise Camera – 1 year	470
SMA-RDR-E-1Y	SMA for 1 Synergis Enterprise Reader – 1 year	85

c) Example 3: Single Year SMA Add-on

Customer has an existing unified Video/ACS SC5 system. He purchased the Enterprise version of Synergis with 50 Readers, the Pro version of Omnicast with 75 Camera, has 2 Sharp Cameras and has an SMA Plus that ends on October 12th 2012. (Information available on the GTAP)

Customer adds an extra building to his system with an additional 25 Omnicast Pro cameras and 12 Synergis Enterprise readers on July 16th 2012, which means 89 days are left on his SMA. (Information available on the GTAP)

Since the customer is adding 25 cameras and 12 readers, this means that we must compute 25 x 89 Omnicast Pro Camera 1 Day SMA parts and 12 x 89 Synergis Enterprise Reader 1 Day SMA parts as shown below:

Part No	Description	Qty
SMA-CAM-P-1D	SMA for 1 Omnicast Pro Camera – 1 day	2,225
SMA-RDR-E-1D	SMA for 1 Synergis Enterprise Reader – 1 day	1,068

d) Example 4 : Multi-year SMA Add-on

Customer has an existing unified Video/LPR SC5 system. The system is composed of 500 Omnicast Enterprise Cameras, 20 AutoVu Sharp Cameras, 5 AutoVu Patrollers and has an SMA that ends on March 14th 2014. (Information is available on the GTAP)

Customer expands his fleet of AutoVu Patrollers by adding 5 extra vehicles on September 4th 2012, which means there are 557 days left in the SMA. (Information available on the GTAP)

Since the customer is adding 5 patrollers, this means that we must compute 5 x 557 Patroller 1 Day SMA parts as shown below:

Part No	Description	Qty
SMA-PATR-1D	SMA for 1 AutoVu Patroller – 1 day	2,785

5.2 Hardware Extended Warranties

5.2.1 Hardware Extended Warranty Availability

5.2.2 Hardware Extended Warranty Multi-Year Discount

(See Appendix B – Hardware Warranty Lengths) All Extended Warranty line items have their respective multi-year counterparts that are used for ordering a multi-year Extended Warranty.

Since these multi-year agreements represent a long term commitment to Genetec, an additional discount is factored in to all multi-year Extended Warranty line items, In order to benefit from this long term commitment discount, the full amount for a multi-year Extended Warranty must be paid in full at the time of purchase or renewal.

5.2.3 Hardware Warranty Renewals

Hardware Warranty renewal notices are automatically sent 90 days and 45 days prior to the anniversary date, indicating that the Warranty is about to expire. All Hardware Extended Warranty renewals are priced according to the most recent price list in effect at the time of the renewal.

5.2.4 Hardware Extended Warranty Ordering Information

Genetec's hardware extended warranty prices can be found in Genetec's price book. DEPARTMENT ORDER**ADMINISTRATIVE ORDER #001-2015****DATE ISSUED: 01/5/15****SUBJECT: AUTOMATED LICENSE PLATE READER USE****PURPOSE:**

This order establishes guidelines for the use of the Berkeley Police Department's Automated License Plate Reader (ALPR) technology and data. ALPR technology functions by automatically capturing an image of a vehicle's license plate, transforming that image into alphanumeric characters using optical character recognition software, and storing that information, along with relevant metadata (e.g. geo-location and temporal information, as well as data about the ALPR unit). ALPRs may be used by the Berkeley Police Department Parking Enforcement and Traffic Units for official law enforcement purposes. This Administrative Order shall remain in effect until January 6, 2016, or when superseded by the issuance of a General Order governing ALPR use.

ADMINISTRATION OF ALPR DATA:

Any installation and maintenance of ALPR equipment, as well as ALPR data retention and access, shall be managed by the Investigations Division Captain through the Parking Enforcement Unit. The Investigations Division Captain will assign personnel under his/her command to administer the day-to-day operation of the ALPR equipment and data.

ALPR OPERATION:

Use of an ALPR is described below. Department personnel shall not use, or allow others to use the equipment or database records for any unauthorized purpose.

- a. An ALPR shall only be used for official and legitimate law enforcement business.
- b. Reasonable suspicion or probable cause is not required before using an ALPR.
- c. No member of this department shall operate ALPR equipment or access ALPR data without first completing department-approved training.
- d. No ALPR operator may access California Law Enforcement Telecommunications System (CLETS) data unless otherwise authorized to do so.

ALPR DATA COLLECTION AND RETENTION:

All data and images gathered by an ALPR are for the official use of the Berkeley Police Department, and because such data may contain confidential CLETS information, are not open to public review. ALPR information gathered and

retained by this department may be used and shared with prosecutors or others only as permitted by law.

The Parking Enforcement Manager is responsible for ensuring proper collection and retention of ALPR data. Technical support and assistance shall be provided by City Department of Information Technology personnel.

All ALPR data shall be stored and purged as described below in this order and thereafter shall be purged unless it has become, or it is reasonable to believe it will become, evidence in a criminal or civil action or is subject to a lawful action to produce records. In those circumstances the applicable data shall be downloaded from the server onto portable media and booked into evidence.

ACCOUNTABILITY AND SAFEGUARDS:

All saved data will be closely safeguarded and protected by both procedural and technological means. The Berkeley Police Department will observe the following safeguards regarding access to and use of stored data:

- a. Non-law enforcement requests for access to stored ALPR data shall be referred to the Public Safety Business Manager and processed in accordance with applicable law.
- b. Non-law enforcement requests for information regarding a specific vehicle's license plate shall be honored when the requestor is the registered owner of the vehicle in question. The requestor in such cases must provide acceptable proof of their identity and of their ownership of the vehicle in question.
- c. ALPR data downloaded to any workstation or server shall be accessible only through a login/password-protected system capable of documenting all access of information by name, date and time.
- d. Berkeley Police personnel approved to access ALPR data under these guidelines are permitted to access the data for legitimate law enforcement purposes only, such as when the data relate to a specific criminal investigation or department-related civil or administrative action.
- e. ALPR data may be released to other authorized and verified law enforcement officials and agencies for legitimate law enforcement purposes only in connection with specific criminal investigations.
- f. Aggregated ALPR data not related to specific criminal investigations shall not be released to any local, state, or federal agency or entity without the express written consent of the City Manager.
- g. For purposes of a City of Berkeley Parking Enforcement analysis effort, ALPR data may be provided a City of Berkeley consultant on an as-needed basis, upon the specific approval of the Chief of Police or his/her designee.
- h. ALPR system audits should be conducted by personnel assigned to the Professional Standards Bureau on a regular basis, at least biennially.

- i. ALPR "read" data retention periods may vary, depending on the system using the ALPR. Regardless of system use, all ALPR "read" data shall be retained for no longer than 365 days, after which point it shall be automatically purged from the server or storage device.

CURRENT ALPR DEPLOYMENT-SCOFFLAW ENFORCEMENT:

The Berkeley Police Department uses ALPR technology in the Parking Enforcement Unit for Scofflaw Enforcement. The Scofflaw Enforcement program (often referred to as the "booting" program) utilizes an ALPR to scan license plates, and checks scanned "reads" against a file of vehicles which have five or more outstanding citations. Typically, upon a confirmed "hit," the vehicle is immobilized with a "boot", or towed, and the owner has to pay the outstanding citations and fees in order to release the boot and/or recover their car. This allows the city to recover outstanding citation fees and penalties. ALPR equipment is installed in the Parking Enforcement Unit's Scofflaw Enforcement vehicle and a marked Traffic Enforcement vehicle, allowing for scofflaw enforcement using both vehicles.

The contracted vendor for the City's Scofflaw Enforcement program is Paylock. Paylock stores data on a secure server, and provides access to authorized personnel Paylock's "Bootview" secure website, as described below:

- a. All data captured by the ALPR is stored on the laptop for 30 days, and is only accessible during that period via the ALPR proprietary software. This includes reads, hits, and photographs associated with each.

When a car is booted and/or towed, the read, hit, and photographic data relating to the booting and/or towing of scofflaw vehicles is uploaded to Paylock's secure server. No other data is uploaded to Paylock's secure server.
