### BACKGROUND

On December 10, 2019, Councilmember Harrison and cosponsor Councilmember Hahn submitted a draft Ordinance regulating the use of carryout and pre-checkout bags and promoting the use of reusable bags. The Agenda Committee referred the item to the FITES Committee on November 25, 2019.

By closing loopholes in state and county law, the ordinance is aimed at avoiding unnecessary waste, promoting reuse, reducing greenhouse gas emissions, and protecting land/sea wildlife and the urban environment.

Committee consideration of the item was initially delayed due to examination of statewide preemption issues and the COVID-19 pandemic. Subsequently, the item has gone through a number of revisions.

The latest draft of the ordinance has been crafted to consider and complement existing regulations at the state and county levels. With respect to the regulation of carryout bags, this ordinance is intended to *only* regulate entities for which the City is not preempted by the state. Neither the state nor county regulate pre-checkout bags, however, the proposed ordinance would. This ordinance does not regulate bags that are integral to the manufacturing of products, i.e., product bags, and provides and provides a limited exemption process.

As currently drafted, the ordinance does the following across the following bag types and entities:

#### **Carryout bags:**

- Bans thicker plastic film carryout bags, except for bags that contain hot liquids, for:
  - restaurants, take-out food stores, and food trucks.
  - permitted events and city-sponsored events
  - any other commercial establishment not regulated by the state<sup>1</sup>
- Defines reusable carryout bags as non-plastic film across:
  - restaurants, take-out food stores, and food trucks.
  - permitted events and city-sponsored events
  - any other commercial establishment not regulated by the state

---

<sup>1</sup> e.g., smaller clothing stores/book/furniture/electronic/gift stores, clothing stores/book/furniture/electronic/gift stores that don't sell perishable goods and have < \$2 million revenue, grocery stores under \$2 million that don't sell alcohol, convenience stores that don't sell alcohol, small pharmacies < 10k square feet etc.

- Charges \$0.10 for paper bags at:
  - restaurants, take-out food stores, and food trucks.
- *Second phase 2023*: requires any paper carryout bag provided by the following be 100% recycled material:
  - restaurants, take-out food stores, and food trucks.
  - permitted events and city-sponsored events
  - any other commercial establishment not regulated by the state

**Pre-Checkout Bags:**

- Bans all but paper pre-checkout bags, except upon request for meat/seafood, across:
  - all stores & events
- Charges \$ 0.10 min. for any paper pre-checkout bag; *Second phase in 2023*: requires any paper pre-checkout bag to be 100% recycled across:
  - all stores & events
- Defines pre-checkout bags as non-plastic film:
  - all stores & events

In addition, the ordinance prevents stores from unreasonably denying customers from bringing their own reusable bags and containers.

As part of its consideration of the proposed ordinance, the FITES Committee provided direction at its July 21, 2021 meeting that the Zero Waste and Energy Commissions (or successor Commission) should hold joint meetings with respect to the ordinance aimed at conducting community/business outreach and education events to include the people and entities regulated by the ordinance and to make recommendations regarding any amendments and appropriate phasing of the law to FITES.

The Zero Waste and Energy Commissions respectively focus on issues ranging from City solid waste policy and goals to climate protection and energy conservation. It is in the public interest for the Council to engage its citizen-led commissions to assist in the outreach process to community members and businesses that may be impacted by the proposed ordinance.

**FISCAL IMPACTS**

Noticing and providing assistance to Commissioners to conduct a series of community outreach meetings will require staff time.

**11.63.010 Findings and purpose.**

The Council of the City of Berkeley finds and declares as follows:

- A. Single-use plastic bags and plastic produce bags are a significant contributor to street litter, ocean pollution, marine and other wildlife harm and their production creates greenhouse gas emissions.
- B. The production, consumption and disposal of plastic based bags contribute significantly to the depletion of natural resources. Plastics in waterways and oceans break down into smaller pieces that are not biodegradable, and present a great harm to the global environment.
- C. Among other hazards, plastic debris attracts and concentrates ambient pollutants in seawater and freshwater, which can transfer to fish, other seafood and salt that is eventually sold for human consumption. Certain plastic bags can also contain microplastics that present a great harm to our seawater and freshwater life, which indirectly presents a threat to human life.
- D. It is in the interest of the health, safety and welfare of all who live, work and do business in the City that the amount of litter on public streets, parks and in other public places be reduced.
- E. The City of Berkeley must eliminate solid waste at its source and maximize recycling and composting in accordance with its Zero Waste Goals. Reduction of plastic bag waste furthers this goal.
- F. The State of California and Alameda County Waste Management Authority both regulate single-use, paper, and reusable carryout bags respectively under SB 270/Proposition 67 and Ordinance 2012-02 (as amended by Ordinance 2016-02). However, neither currently address all establishments or pre-checkout (e.g., produce) bags to carry fruits, vegetables, and other loose or bulky items while shopping before reaching the checkout area. These bags, which are often plastic, share many of the same physical qualities as single-use plastic carryout bags no longer permitted in California, and are difficult to recycle, reuse or compost.
- G. The State also does not regulate the price of bags provided at the point of sale by restaurants and streets events, including farmers' markets. While the County's Ordinance 2016-02 regulates restaurant carryout bags, it allows thicker film plastic.
- H. The City of Berkeley currently regulates a number of disposable plastic items through the Single-Use Foodware and Litter Reduction Ordinance (Ord. 7639-NS § 1 (part), 2019), but does not impose regulations with respect to bags. It is in the public interest to reduce plastic and paper waste in areas not preempted by the State of California.
- I. This Chapter is consistent with the City of Berkeley's 2009 Climate Action Plan, the County of Alameda Integrated Waste Management Plan, as amended, and the CalRecycle recycling and waste disposal regulations contained in Titles 14 and 27 of the California Code of Regulations.

Among other hazards, plastic debris attracts and concentrates ambient pollutants in seawater and freshwater, which can transfer to fish, other seafood and salt that is eventually sold for human consumption. Certain plastic bags can also contain microplastics that present a great harm to our seawater and freshwater life, which indirectly presents a threat to human life.
- D. It is in the interest of the health, safety and welfare of all who live, work and do business in the City that the amount of litter on public streets, parks and in other public places be reduced.
- E. The City of Berkeley must eliminate solid waste at its source and maximize recycling and composting in accordance with its Zero Waste Goals. Reduction of plastic bag waste furthers this goal.
- F. The State of California and Alameda County Waste Management Authority both regulate single-use, paper, and reusable carryout bags respectively under SB 270/Proposition 67 and Ordinance 2012-02 (as amended by Ordinance 2016-02). However, neither currently address all establishments or pre-checkout (e.g., produce) bags to carry fruits, vegetables, and other loose or bulky items while shopping before reaching the checkout area. These bags, which are often plastic, share many of the same physical qualities as single-use plastic carryout bags no longer permitted in California, and are difficult to recycle, reuse or compost.
- G. The State also does not regulate the price of bags provided at the point of sale by restaurants and streets events, including farmers' markets. While the County's Ordinance 2016-02 regulates restaurant carryout bags, it allows thicker film plastic.
- H. The City of Berkeley currently regulates a number of disposable plastic items through the Single-Use Foodware and Litter Reduction Ordinance (Ord. 7639-NS § 1 (part), 2019), but does not impose regulations with respect to bags. It is in the public interest to reduce plastic and paper waste in areas not preempted by the State of California.
- I. This Chapter is consistent with the City of Berkeley's 2009 Climate Action Plan, the County of Alameda Integrated Waste Management Plan, as amended, and the CalRecycle recycling and waste disposal regulations contained in Titles 14 and 27 of the California Code of Regulations.
