# Police Equipment and Community Safety Ordinance 2021 Annual Report

# INTRODUCTION

On May 11, 2021 the Berkeley City Council passed Ordinance NO. 7,760-N.S., the Police Equipment and Community Safety Ordinance. Section 2.100.050 of the ordinance mandates an annual report for the deployment of specific equipment the Berkeley Police Department possesses. This annual report also fulfills the obligations set forth in Assembly Bill No.481. Below is a list of the reportable equipment under the city ordinance and Assembly Bill No.481:

- Patrol Rifle
- Less Lethal single 40MM launcher
- Less Lethal Milkor LTL 40 MM multi-launcher
- Less Lethal FN 303 Launcher
- FN Pava rounds
- Oleoresin capsicum (OC spray)
- Chlorobenzylidene Malononitrile and Oleoresin capsicum (tear gas)
- Remington 700 Precision Rifle
- ReconRobotics Recon Scout XT Robots
- Andros Remotec HD-1 Hazardous Duty Robot
- Light/sound distraction device
- Long Range Acoustic Device (LRAD)
- 36" batons
- Mobile Command Vehicle
- Barret Model 99 Precision Rifle

The annual report on the controlled equipment shall contain the following information per Ordinance NO. 7,760N.S.:

- (a) Production descriptions for Controlled Equipment and inventory numbers of each product in the Police Department's possession.
- (b) A summary of how Controlled Equipment was used. For the purposes of annual reports, "use" of equipment shall refer to equipment that is Deployed, not to transfers of location or placement of equipment inside Department vehicles.

- (c) If applicable, a breakdown of where Controlled Equipment was used geographically by individual police area. For each police area, the Police Department shall report the number of days or instances in which Controlled Equipment was used and what percentage of those daily reported uses were authorized by warrant and by non-warrant forms of court authorization.
- (d) A summary of any complaints or concerns received concerning Controlled Equipment.
- (e) The results of any internal audits, any information about violations of Controlled Equipment Use Policies, and any actions taken in response.

There have been no internal audits (other than those conducted to gather and confirm data for this report), identified violations of equipment use, or any complaints concerning the above listed equipment. For inventory numbers and description of each equipment refer to the Impact Statements.

Section 2.100.020 (D) defines deployment as “to utilize or employ Controlled Equipment for a deliberate purpose in the presence of members of the public during management or control of crowds, during any Special Response Team deployment or to affect some response from members of the public during any other operation or critical response. “Deployed” shall not mean an officer merely wearing a piece of Controlled Equipment on their belt or elsewhere on their person.” Deployment means the display of the equipment to affect some response from members of the public. The equipment does not have to be used; simply having it and in view of a person to specifically affect a response would be considered a deployment. Deployments are to be reported per the ordinance and the table on page 5 of this report reflects both deployments and uses of equipment.

On the date of passage of the Police Equipment and Community Safety Ordinance on May 11, 2021 the Police Department’s Blue Team system was already being utilized to capture the deployment of patrol rifles as well as all uses of force, including the use of less-lethal systems. However, although the use of the above listed equipment was thoroughly documented in police incident or crime reports, no system existed where the deployment of each defined equipment could be

extracted. In response to this, the Professional Standards Bureau and the Police Technology Unit collaborated to develop a new system that was capable of fulfilling the obligations set forth by the ordinance.

The development of the new system began immediately after the ordinance was adopted and the new Equipment Ordinance System was created. Every sworn member of the Berkeley Police Department was trained on this new Equipment Ordinance System, hereinafter referred to as EO System. The EO System was fully implemented in October 2021.

It should be noted that the data on equipment deployments in 2021 does not capture deployments for the entire year. The ordinance was passed in May of 2021. The development and implementation of the EO System and the training of all sworn personnel was completed in October 2021.

The Police Department responded to over 42,500 calls from the community in 2021 and 11,262 were calls which occurred following the development of the new EO System that captured equipment deployments mandated by the ordinance. Of the 11,262 calls received, 29 of them resulted in the deployment of either a patrol rifle or a less-lethal system capable of launching a rubber projectile or a projectile similar to that of a paintball. For details on these systems refer to the Impact Statements located on the Berkeley Police Department website.

The Blue Team system was fully implemented in March of 2021. The system documents all uses of force which includes patrol rifle deployments and uses of less-lethal systems. This system is maintained by the Internal Affairs Bureau. In 2021 there were five incidents where less-lethal systems were used and 14 incidents where a patrol rifle was deployed. These incidents were recorded prior to the EO System going live. Three of the five less-lethal system uses were also entries into the EO System because they occurred after the launch of the EO System.

The table on page 5 details each of the 47-equipment deployment/use incidents extracted from the Blue Team and EO systems as well as 2 deployments of the Hazardous Duty Robot by the Berkeley Police Bomb Squad. Each row within the table represents an incident where a specified equipment was deployed/used. The number of specified equipment deployed per incident is not represented. The

table includes the service of 14 search warrants; 6 of which were served by the Special Response Team in cases involving a violent suspect. Equipment that is not outlined in the table was not used in 2021.

It should be noted that all other equipment deployments that are not related to the service of a search warrant were incidents where officers responded to a call for service by community members. Incident #6 & #17 are the only exceptions. #6 is an incident where an officer witnessed a stabbing and had to take immediate action to save the victim and apprehend the suspect and #17 is an incident where a stolen car and suspect were tracked down by officers. The 5 incidents where less-lethal systems were actually utilized are marked with asterisks next to the incident number. The incidents are listed in chronological order.
