PROJECT INFORMATION

Project Address(es):

Unit(s)/Suite(s) #:

Assessor Parcel Number(s):

The Zoning Project Submittal Requirements packet describes all of the materials required to submit a complete Zoning Project Application to the Land Use Division of the Planning and Development Department.

The checklist on pages 1-2 of this packet must be completed, signed, and submitted with the Application. You must initial each Section and check each box that corresponds to an item submitted for review.

Staff will verify that the minimum submittal requirements have been included within 30 days of receiving an application submittal, per Government Code Section 65943 (30-Day Review Period). Applications that are missing the materials will be deemed incomplete and not accepted for permit processing review. During the permit processing review, you may be required to clarify, amplify, correct, or supplement the information listed in the submittal requirements per Government Code Section 65944 (Agency Acceptance of Applications).

Section 1 is a checklist of materials required for all projects. Sections 2-7 are checklists of materials that may be required based on the project type or location.

Each submittal requirement on the checklist is described further in this packet, starting on page 3. Each description identifies whether an item is required, and indicates how to prepare each document, drawing, material, and/or report. Hyperlinked forms and instructions are also online under Land Use at <https://berkeleyca.gov/construction-development/permits-design-parameters/permit-types/permit-forms>.

All documents, reports and plans must be provided in digital format, unless requested in hard copy. Printed plans are required prior to public meetings and/or hearings. See the [Guide to Submitting a Zoning Project Application](#) for details on how to submit, review timing, and digital plans and document.

B. BERKELEY ENERGY CODE AND BERKELEY GREEN CODE

Required for newly constructed buildings (buildings that have never before been used or occupied for any purpose).

Submit the following:

1. A statement, and corresponding features on plans, that the proposed project is designed to comply with the Berkeley Energy Code (BMC Chapter 19.36) and Berkeley Green Code (BMC Chapter 19.37) including solar PV system, battery energy storage, electric vehicle charging, and low-carbon concrete requirements. Note that for building permit submittal, quantitative values for appliance fuel efficiency must be included in relevant building permit architectural sheets, and window and door schedules, and on architectural, plumbing, and mechanical sheets, matching those values stipulated in prescriptive or performance energy compliance documents.

Note: Carefully consider the Building Code prior to submitting a Use Permit application. Per the standard Conditions of Approval for all development projects, only the Zoning Adjustments Board may approve a modification to the use or structure for which the Permit is issued, except that the Zoning Officer may approve changes that do not expand, intensify, or substantially change the use or building.

The [California Energy Design Assistance \(CEDA\) Program](#) provides free energy design assistance, financial incentives, and operational energy savings to new commercial, public, multifamily (4 stories or more), industrial, and agricultural buildings. CEDA application must occur while a project is in early design phases.
