APPENDIX 2

RECORDS DOCUMENTATION/ASTM QUESTIONNAIRE
PRE-SURVEY QUESTIONNAIRE AND DISCLOSURE STATEMENT

Please complete this questionnaire before the Consultant's site visit. For those questions that are not applicable to the subject property please respond with an "N/A". This document needs to be signed by the Owner or his/her representative (Item No. 2). If you have any questions about how to answer any of the questions please call Steve Bittman at 510-612-8751. If additional pages for response are necessary please attach them to this form. Clearly mark all references to the appropriate question number(s). This document and your written response to same may be an exhibit in the report.

1. PROPERTY INFORMATION:

Property Name:

All Known Property Addresses:

2029-2035 Blake Street

City

Berkeley

State

CA

Zip

94704

Assessor's Parcel Number:

55-1822-9, 55-1822-8-3 and 55-1822-8-2

2. COMPLETED BY

Signature

[Signature]

Date

11-4-13

Printed Name

Ralph A. Anthenen

Title

Co-trustee, Anthenen Trust

3. ASTM-REQUIRED INQUIRIES

Property Owner:

Name: Anthenen Trust

Phone: 510 548-9753 Fax: 510 548-8175

Key Site Manager (Site contact):

Name: Ralph Anthenen

Phone: 510 548-8175

If not residential Property, please provide list of tenants, including contact names and phone numbers.

Can you provide a Current Title Abstract for the Property, including a chain of Title? If so, please send documents along with completed questionnaire to International Geologic

Yes [] No []

Do you have knowledge of any environmental liens recorded against the Property, or environmentally related Activity and Use Limitations of the Property?

Yes [x] No []

Do you have any specialized knowledge that would be material in identifying, recognized environmental conditions in connection with the Property?

Yes [x] No []

Are you aware of a reduction in the property value due to environmental issues?

Yes [x] No []

Please attach explanation of all affirmative answers.

b) Please state reason for procuring this Phase I ESA:

- [ ] Qualify for Innocent Landowner defense to CERCLA Liability.
- [x] Other: (state below) Preparation For Selling

Please return completed form and any attachments to Steve Bittman of International Geologic:

INDIVIDUAL GRANT DEED

The undersigned grantors declare:

Documentary transfer tax is $0; transfer for no consideration.

ANTON ANTHENIEN and FRANCES W. ANTHENIEN, who acquired title as FRANCES WILMA ANTHENIEN, his wife, as joint tenants

hereby grant to

ANTON ANTHENIEN and FRANCES W. ANTHENIEN, Trustees, ANTHENIEN Trust, dated March 4, 1991, as community property

the following described property in the City of Berkeley, County of Alameda, State of California.

FOR LEGAL DESCRIPTION, SEE EXHIBIT A ATTACHED HERETO.

Commonly known as 2029 Blake Street
APN: 55-1022-9

Dated: March 4, 1991

ANTON ANTHENIEN
FRANCES W. ANTHENIEN

State of California
County of Contra Costa

On March 4, 1991, before me, the undersigned, a Notary Public in and for said State, personally appeared ANTON ANTHENIEN and FRANCES W. ANTHENIEN, personally known to me, or proved to me on the basis of satisfactory evidence to be the persons whose names are subscribed to the within instrument and acknowledged to me that they executed the same in their authorized capacities, and that by their signatures on the instrument the persons, or the entity upon behalf of which the persons acted, executed the instrument.

WITNESS my hand and official seal, this 4th day of March, 1991.

Notary Public

OFFICIAL SEAL
RONALD C. SOLOW
NOTARY PUBLIC - CALIFORNIA
CONTRA COSTA COUNTY
My Commission Expires June 3, 1993
EXHIBIT "A"

BEGINNING at point on the Northern line of Blake Street, distant thereon Westerly 241.62 feet from the intersection thereof with the Western line of Shattuck Avenue; running thence Westerly along said line of Blake Street 65 feet; thence at right angles Northerly 129.62 feet; thence at right angles Easterly 50 feet; thence at right angles Northerly 1/100 of a foot; thence at right angles Easterly 15 feet; thence at right angles Southerly 129.65 feet to the point of beginning.

BEING a portion of Plot No. 68, as said plot is delineated and so designated upon that certain Map entitled, Kellersberger's Map of the Vicente and Domingo Fervieta Rancho, on file and of record in the office of the County Recorder of Alameda County.

Commonly known as 2029 Blake Street.

### E. LOCAL REQUIREMENTS

You must complete a Hazardous Materials Business Plan (HMBP) if you use or store hazardous materials or hazardous wastes in combined (aggregate) quantities equal to or greater than 55 gallons for liquids, 500 lbs. for solids or 200 cubic feet for compressed gases. Additionally, if you use or store any quantity of etiological agents, radioactive materials or Ozone-Depleting Compounds (ODCs) you must complete a HMBP. [Berkeley Municipal Code Chapter 11.52, Ordinance No. 6271-N.S.] If your facility meets these criteria, you must submit a Hazardous Materials Inventory-Chemical Description page for each material and/or waste at your facility. Alternatively, you may report all materials and/or wastes on the Chemical Inventory Spreadsheet.

Inquiry for Incident No 99-002871 Exposure No 000

2245 responded to a auto leaking fuel. We found a compact vehicle in front of a service garage, with its owner standing by. The owner of the auto stated that the fuel leak had started elsewhere, but that she'd had the auto towed here to be repaired. We stopped the leak using an epoxy compound, and picked up the spilled fuel with absorbant. The absorbant was left for service garage disposal.

Incident Inquiry

Inquiry for Incident No 95-003912 Exposure No 000

State: Zip: Voltage:
Transport Type: 11 ICC/DOT Permit #:
Driver's License: St:

AUTHOR: WEBBA IG data from CAD on 05/25/95 at 0054

Reporting Party: MCCLINTOCK RED'S SERVICE
Address: 2029 BLAKE
Phone: (510) 649-1197

2245, 2242, 2243, 2275, 2291, and 2204 responded. The fire was a car fire away from a building. 2245 handled. A mechanic, attempting to move a stored vehicle, noticed that it was leaking fuel. As he turned the engine off the leaking fuel caught fire. Employees applied dry chemical extinguishers to the fire, but were unable to extinguish it. 2245 extinguished the fire using a booster line and tank water. Extensive damage was done to the engine compartment, causing an estimated $1200.00 damage.

MEMO TO FILE

Re: 2029 Blake Street, Mostly Foreign Auto Repair Shop

Mr. Lou Evart, 849-9817, promoter for a New Years Eve dance party for Alternative Music Productions proposed to use subject auto repair shop 12-31-89 for a dance party for 500 persons.

Entertainment Permit application is dated 11-17-89. The Health Department approved the application on 12-6-89. The Police Department approved the application on 12-20-89. The Fire Department received the application on 12-21-89 and denied the application on 12-22-89 because the building did not meet code requirements for the proposed use. The Building Department denied the application for the same reason on 12-26-89.

The Fire Marshal Rayford Hiatt and the Building Official, Harry Attri met the applicant Mr. Evart at the site on 12-26-89 to discuss the matter. Mr. Evart was informed that the building did not comply with local ordinance or State regulations for the proposed use. Mr. Evart was requested to provide the City with a plan of the building indicating type of construction, floor dimensions, property lines, etc. and the City would respond in writing regarding the requirements that would have to be met.

Five hundred persons for assembly use would place the occupancy group in an A.2.1 classification.

It was recommended to Mr. Evart that based on the time factor that he obtain an alternate site. Also that the Fire Department had a list of assembly buildings that he could check out. Mr. Evart declined.

It is noted that the auto repair facility had several code violations including the existing exit system and lack of a required one hour fire wall between the auto repair and large new appliance storage at the rear of the shop H-4/B-2.

Rayford R. Hiatt
Assistant Fire Chief/Fire Marshal

APPLICATION FOR USE OR CHANGE OF OCCUPANCY

APPOINTMENT DATE: 6/10/73  TIME: 3:00 PM  CODE NO: 5
APPLICANT OR AGENT: Alegza Silva
ADDRESS: 2394 Road 20 4th, San Pablo
PHONE: 232-7883  ZONE: C-2  STORY: 1

PRESENT USE: Garage
PROPOSED ALTERATIONS: as needed
PROPOSED USE: Garage

SIGNATURE: /s/ Robert John Alegza

NOTE:
A CERTIFICATE OF OCCUPANCY WILL BE ISSUED WHEN ALL OF THE CONDITIONS NOTED BELOW ARE COMPLETED:

PLANS REQUIRED:
PERMITS REQUIRED:
ZONING:
FIRE:
SANITATION:
BUILDING:

SEE THE ATTACHED REPORT

USE PERMIT REQUIRED
SEE ZONING OFFICER

DATE: APRIL 17, 1973
BDLG. INSPECTOR
HOWARD J. MARDIS

APPLICATION SHALL BECOME VOID IF WORK IS NOT COMMENCED IN SIXTY (60) DAYS.
CHANGE OF OCCUPANCY REPORT

1. Obtain a Use Permit. This shall be completed before any corrective measures are undertaken.

2. Provide two (2) approved means of egress.

3. All required exit doors shall be not less than thirty-six (36) inches wide.

4. All required exit doors shall be openable from the inside without the use of a key or any special knowledge or effort. In lieu of the above, the following wording in letters not less than one (1) inch in height on a contrasting background may be installed over the door inside: "This door to remain unlocked during business hours."

5. All required exit doors shall have direct access to a public way. Provide an approved easement for the second means of egress.

6. Corridors used as part of the exit system shall be not less than forty-four (44) inches wide.

7. Provide four (4) 50 A. B. C. fire extinguishers. These units shall be wall mounted not more than five (5) feet above the floor in a readily accessible location.

8. Provide approved parts washing tank. This tank shall be provided with approved spring loaded cover on a fusible link.

9. Provide approved storage containers for waste materials. These units shall be metal and shall have tight fitting lids.

10. No device generating a flame or glow capable of igniting gasoline vapors shall be used within twenty-four (24) inches of the floor.

11. Electrical system shall be checked and put into a safe condition.

12. NOTE: All signs require a special building permit. This includes any copy or change of copy visible from the street. All existing signs shall be made to conform to the Sign Ordinance, City of Berkeley or shall be removed.

13. Obtain all related building permits.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

**Federal RCRA generators list**

RCRA-SQG: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 09/05/2013 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 09/16/2013 has revealed that there are 38 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board’s Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 09/16/2013 has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### SWEEPS UST: Statewide Environmental Evaluation and Planning System

This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990’s. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 9 SWEEPS UST sites within approximately 0.25 miles of the target property.

### Other Ascertifiable Records

RCRA NonGen / NLR: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/11/2013 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.
HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 27 HIST CORTESE sites within approximately 0.5 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, and dated 09/10/2013 has revealed that there is 1 DRYCLEANERS site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR’s HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 33 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as “High Risk Historical Records”, or HRHR. EDR’s HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 12 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.
Due to poor or inadequate address information, the following sites were not mapped. Count: 43 records.

### AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem)

AFS (Aerometric Information Retrieval System) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 09/30/1986
Facility name: BERKELEY HONDA
Site name: JIM DOTEN FIDELITY MOTORS
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN
JIM DOTE FIDELITY MOTORS (Continued)

OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

Waste code: F008
Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Violation Status: No violations found

FINDS:

Registry ID: 110002739163

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Historical Generators:
Date form received by agency: 09/01/1996
Facility name: HUSTEADS COLLISION CENTER
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS
HUSTEADS COLLISION CENTER (Continued) 1000397808

CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
PACIFIC BELL (Continued)

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

</table>
To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

**Federal NPL site list**

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

| Date of Government Version: 04/26/2013 | Source: EPA |
| Date Data Arrived at EDR: 05/09/2013 | Telephone: N/A |
| Date Made Active in Reports: 07/10/2013 | Last EDR Contact: 10/11/2013 |
| Number of Days to Update: 62 | Next Scheduled EDR Contact: 01/20/2014 |

NPL Site Boundaries

| EPA Region 10 |
| 206-553-8665 |

**Proposed NPL:** Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

| Date Made Active in Reports: 07/10/2013 | Last EDR Contact: 10/11/2013 |
| Number of Days to Update: 62 | Next Scheduled EDR Contact: 01/20/2014 |

**NPL LIENS:** Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: No Update Planned
Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013
Date Data Arrived at EDR: 05/09/2013
Date Made Active in Reports: 07/10/2013
Number of Days to Update: 62

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013
Date Data Arrived at EDR: 05/29/2013
Date Made Active in Reports: 08/09/2013
Number of Days to Update: 72

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 04/26/2013
Date Data Arrived at EDR: 05/29/2013
Date Made Active in Reports: 08/09/2013
Number of Days to Update: 72

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.
Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.
Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

- Date of Government Version: 06/17/2013
- Date Data Arrived at EDR: 06/21/2013
- Date Made Active in Reports: 10/03/2013
- Number of Days to Update: 104
- Latest EDR Contact: 09/10/2013
- Next Scheduled EDR Contact: 12/23/2013
- Data Release Frequency: Varies

Source: Environmental Protection Agency
Telephone: 703-603-0695

US INST CONTROL: Sites with Institutional Controls
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

- Data Release Frequency: Quarterly

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

State- and tribal - equivalent CERCLIS
ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s)
EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate
further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL));
State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor
provides similar information to the information that was available in CalSites, and provides additional site information,
including, but not limited to, identification of formerly-contaminated properties that have been released for
reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses,
and risk characterization information that is used to assess potential impacts to public health and the environment
at contaminated sites.

Date of Government Version: 09/05/2013
Date Data Arrived at EDR: 09/05/2013
Date Made Active in Reports: 10/10/2013
Number of Days to Update: 35

State and tribal landfill and/or solid waste disposal site lists

SWF/LF (SWIS): Solid Waste Information System
Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal
facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section
4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 08/19/2013
Date Data Arrived at EDR: 08/19/2013
Date Made Active in Reports: 10/08/2013
Number of Days to Update: 50

State and tribal leaking storage tank lists

LUST REG 8: Leaking Underground Storage Tanks
California Regional Water Quality Control Board Santa Ana Region (8). For more current information, please refer

**ADDITIONAL ENVIRONMENTAL RECORDS**

**Local Brownfield lists**

**US BROWNFIELDS: A Listing of Brownfields Sites**
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

- **Date of Government Version:** 06/24/2013
- **Source:** Environmental Protection Agency
- **Date Data Arrived at EDR:** 06/25/2013

Local Lists of Hazardous Waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dump sites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.
**HIST CAL-SITES: Calsites Database**

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Local Lists of Registered Storage Tanks

CA FID UST: Facility Inventory Database
The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994
Date Data Arrived at EDR: 09/05/1995
Date Made Active in Reports: 09/29/1995
Number of Days to Update: 24
Source: California Environmental Protection Agency
Telephone: 916-341-5851
Last EDR Contact: 12/28/1998
Next Scheduled EDR Contact: N/A
Data Release Frequency: No Update Planned

UST MENDOCINO: Mendocino County UST Database
A listing of underground storage tank locations in Mendocino County.

Date of Government Version: 09/23/2009
Date Data Arrived at EDR: 09/23/2009
Date Made Active in Reports: 10/01/2009
Number of Days to Update: 8

Local Land Records

LIENS 2: CERCLA Lien Information
A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/06/2013

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management

Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program
(SMBRP) list includes sites cleaned up under the program’s oversight and generally does not include current
or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed
restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management
Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land
use restriction at the local county recorder’s office. The land use restrictions on this list were required by
the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or
part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed
restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 09/11/2013
Date Data Arrived at EDR: 09/11/2013
Date Made Active in Reports: 10/14/2013

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

A listing of NPDES permits, including stormwater.

A listing of underground control injection wells.
CORTESE: "Cortese" Hazardous Waste & Substances Sites List
The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste
Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

**LEAD SMELTER 1: Lead Smelter Sites**
A listing of former lead smelter site locations.

**LEAD SMELTER 2: Lead Smelter Sites**
A list of several hundred sites in the U.S. where secondary lead smelting was done from 1931 and 1964. These sites may pose a threat to public health through ingestion or inhalation of contaminated soil or dust.

**2020 COR ACTION: 2020 Corrective Action Program List**
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records
EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013  Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/19/2013  Telephone: 860-424-3375

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association’s annual survey of hospitals.
Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics’ primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics’ primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision: 1999

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5’ Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
HYDROLOGIC INFORMATION
Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE
Target Property County: ALAMEDA, CA
Flood Plain Panel at Target Property: 06001C - FEMA DFIRM Flood data
Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY
NWI Quad at Target Property: OAKLAND WEST
Data Coverage: YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION
Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:
Search Radius: 1.25 miles
Status: Not found

AQUIFLOW
Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.
GROUNDWATER FLOW VELOCITY INFORMATION
Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Tierra
Soil Surface Texture: loam
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class: Moderately well drained
Hydric Status: Not hydric
Corrosion Potential - Uncoated Steel: High
Depth to Bedrock Min: > 0 inches
Depth to Watertable Min: > 0 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

RE: Authorization for Rhoades Planning Group to Act as Agent for 2035 Blake Street, LLC

To Whom It May Concern,

Xin Jin, managing member of 2035 Blake, LLC, hereby authorizes Mark Rhoades and/or Katie Gladstein of Rhoades Planning Group to act as agents for the property located at 2029 to 2035 Blake Street. This authorization applies to all entitlement related activities, submittals and representations.

Sincerely,

[Signature]

Xin Jin
Managing Member
2035 Blake, LLC
2343 Stuart Street
Berkeley, CA 94704

cc: Rhoades Planning Group
Overview and Project Introduction

Rhoades Planning Group is pleased to present this proposal for The Roost @ Blake, a new mixed use infill development project located at 2029-2035 Blake Street. The project will build on the character of the neighborhood, which includes mixed-use developments and commercial spaces on Shattuck Avenue and side streets, as well as a residential neighborhood to the west. The project will include ground floor commercial space, as well as three ground-floor live-work units. The upper floors will provide high-quality residential apartment units with numerous community amenities.

The project site is designated as Avenue Commercial in the City’s General Plan, and fulfills the goals of the Avenue Commercial designation, which is characterized by pedestrian-oriented commercial development and multi-family residential structures. Goals within areas designated as Avenue Commercial include supporting a vibrant pedestrian-oriented area that serves residents and provides necessary goods and services. The site is zoned South Area Commercial (C-SA), and furthers the goals of the South Berkeley Area Plan including enhancement of economic development and encouragement of mixed use developments, which are more appropriate in scale and character to South Berkeley than large single use projects, and which welcome additional residents to contribute to the local commercial market (see South Berkeley Area Plan, pages 40-42).

Additionally, the project site is ½ mile (a 10 minute walk) from the Downtown Berkeley BART station, and is adjacent to a number of AC Transit bus lines, as well as City of Berkeley bicycle routes. Therefore, the project contributes to Berkeley’s Climate Action Plan goals of providing housing in locations close to goods and services, and oriented to use of public- and active-transportation, serving to reduce the City’s overall per capita carbon footprint.
Project Description

The proposed development project is a five-story mixed-use building that includes ground floor commercial retail or quick- or full-service restaurant space, intended to serve surrounding neighbors which include both residential, office, and commercial uses. The ground floor also includes three live/work spaces, which will help to activate the street and continue to encourage the diversity of uses that already exists in the neighborhood, while creating opportunities for entrepreneurism and a zero-commute lifestyle for those who are able to live, work, and fulfill basic personal and business needs in Downtown Berkeley and the South Shattuck area. The total floor area of the proposed project per Zoning Ordinance definition is 68,350 square feet.

Ground level car and bicycle parking will be provided in a garage at the rear of the lot. The project includes 72 studio, one- and two-bedroom apartments on the levels above. Shared and private open space is provided in a podium level courtyard, and on private balconies and roof decks.

The building will provide a number of amenities for residents, including significant bicycle parking, a bicycle fix-it station, and a large shared courtyard that will include a resident outdoor kitchen and dining areas, fireplace, fountain, and a dog run. A common roof deck at the fourth floor will also be available to residents.

A total of six below market rate units are required for the project consistent with the City of Berkeley Inclusionary Housing requirement (10% of market rate units @ 60% AMI), as well as an in-lieu fee for .6 of one unit.

The project provides 61 at-grade parking spaces for residents of the project, live/work tenants, and commercial employees/patrons using parking lifts. Parking will be accessed via a driveway from Blake Street at the west side of the site, and will use lifts for a total of 54 residential parking spaces, meeting the requirement of the C-SA zoning district. Residential parking spaces will be unbundled from the
apartments, meaning that residents may choose whether or not to rent a parking space. The project will also provide three parking spaces for live/work units, and five parking spaces for the commercial use, meeting all parking standards.

Additionally, the project will include 52 secure bicycle parking spaces and a bicycle fix-it station in a secured area accessible from the garage and the residential lobby. The garage driveway will be painted with bicycle sharrows striping and include exterior signage welcoming bicyclists into the garage space, in order to make bicycle transportation increasingly comfortable and attractive for residents. Further, each residential unit will be provided with two free AC Transit passes, and all parking will be unbundled from the residential units.

The project will also add three on-street parking spaces due to the removal of two existing curb cuts. The project will also use two on-street parking spaces to create a small public parklet for use by patrons of the new commercial space and live/work spaces, as well as patrons and office workers from neighboring buildings.

The project will use green building features including solar residential hot water, solar PV ready, and flow-through planters or a bio filtration area.

The project will include demolition of two existing structures currently used for commercial warehousing and storage. A total of 375 cubic yards of earth will be removed from the site to excavate for new foundations. No basement is included as part of the project.

Use Permits Requested

1. 22.12.060(UPPH) – Demolition Permit for Existing Commercial Structures.
2. 23E.52.030.A (UPPH) – Mixed Use Developments (Residential/Commercial) 5,000 sq. ft. or more
3. 23E.52.050 (UP) – Construction of gross floor area more than 3,000 sq. ft.
5. 23E.04.050 (UPPH) – Modify Yard Requirements Adjacent to a Residential Zone
6. 23E.52.030.A (AUP) – Quick/Full Service Restaurant under 5,000 sq. ft.
7. 23E.52.030.A (AUP) – Alcoholic Beverage Service of beer and wine incidental to food service
8. 23E.52.030.A (UPPH) – Live/Work Units
9. 23E.04.020 (AUP) – Rooftop Equipment

CEQA Determination

This project is expected to be exempt from CEQA pursuant to Section 15183.3: Streamlining for Infill Projects. This project meets the eligibility requirements for Infill Streamlining as follows:

- The project site is located in an urban area on a site that has previously been developed;
- The project site is located within ½ mile of a major transit corridor and satisfies the performance standards of Appendix M of the CEQA Guidelines – The project site is located within ½ mile of 5 AC Transit bus stops, including the AC Transit 18 bus line, which runs every 15 minutes during commute hours and brings passengers quickly to the Downtown Berkeley BART station. Additionally, the project is within ½ mile of the AC Transit 800 bus line, which is an all-night
transbay bus line. The project is also ½ mile from the Downtown Berkeley BART station, or an approximately 10 minute walk.

- The Project is consistent with the general use designation, density, building intensity, streetscape and applicable policies specified for the project area in the City’s Zoning Ordinance, specifically with the C-SA zoning district, and South Berkeley Area Plan and South Shattuck Strategic Plan.
- A traffic and parking study prepared for the site by Abrams Associates, included as part of this application package, shows no significant transportation or parking impacts.
- A Phase I environmental analysis prepared by International Geologic LLC, and included as part of this application package, does not indicate the need for a Phase II report, nor for any measures beyond the City of Berkeley’s generally applicable site standards.
- A Historic Resource Evaluation prepared by Preservation Architecture, and attached as part of this application package, evaluates the existing buildings against the criteria employed to determine eligibility for listing on the California Register of Historical Resources and as City of Berkeley Landmarks and Structures of Merit. The report indicates that the existing buildings are not eligible for designation on the basis of any cultural value, and are not architectural examples worth preserving as part of the neighborhood.
- The shadow studies conducted for the project show that the proposed structure will create some increased morning shading for apartment buildings to the north and west of the project site, but not to a significant degree.
- The proposed building is solar ready.

**Zoning and Architectural/Building Amenity Program**

The project is a five-story mixed-use building containing commercial and live/work space, residential apartment units and open-space for residents, and vehicle and bicycle parking.

The project’s ground floor includes one commercial space 2,220 square feet in size. This space is intended as a small neighborhood-serving café, based largely on interest expressed by business owners and office tenants of the building across Blake Street from the project site.

</table>
A large residential lobby is accessible from the sidewalk just west of the commercial space. The lobby provides access to the elevator and stairs, and will feature a large skylight to bring natural light to the lobby from the courtyard above. Residents will be able to walk through this lobby to access the garage, common laundry facilities, large bicycle parking room with space for 52 bicycles, as well as a bike fix-it station that allows residents to perform bike maintenance conveniently in the building.

Adjacent to the residential lobby are three individual live/work spaces ranging in size from 885 square feet to 1,318 square feet. Each live/work space will include a mezzanine, allowing tenants to maintain separation between living space and professional studio or office space.

Vehicle parking will be in a garage at grade level, at the rear portion of the lot behind the street-facing commercial, live/work, and lobby spaces. This garage will be accessible via a driveway from Blake Street at the western side of the site. Parking will use stacking lifts to provide a total of 64 parking spaces, meeting the Zoning Ordinance requirements for residential and live/work parking and slightly exceeding the requirement for commercial parking, as shown in the table below. The calculation for commercial parking assumes the commercial space will be a food-service use, and therefore assumes the most conservative parking requirement.
Additionally, the project will add three on-street parking spaces due to the removal of two existing curb cuts. The project will also proposes the use of two on-street parking spaces to create a small public parklet for use by patrons of the new commercial space and live/work spaces, as well as patrons and office workers from neighboring buildings. This results in one net new on street parking space.

The second through fifth levels of the project will support a total of 72 residential apartment units, including studio, one- and two-bedroom units. The unit mix is reflected in the adjacent table.

<table>
<thead>

<tr>
<td>Two-Bedroom</td>
<td>12</td>
<td>832 s.f.</td>
</tr>
</tbody>
</table>

Residential units at the second floor will pull back considerably from the rear and side property lines, paying special attention to areas where existing adjacent residential structures are closest to the project site. These second floor setbacks create large private patios on the east and west edges of the podium and ground levels. The project will pull back extensively above the podium from the rear property line at the middle of the project site to create a large shared courtyard for residents. Landscaping and programming for this shared open space will include a resident cooking and dining area, fountain, and dog run, creating spaces that are available for active use by residents while protecting privacy and quietude for adjacent residents and apartment units facing into the courtyard.

At the fourth floor, the building will pull away from neighbors at the southwest and southeast corners, creating large private decks for residents. The fourth floor will also include a shared roof deck for residents near the middle of the building facing onto Blake Street. This shared space will allow all residents to enjoy views and sunlight, and will also create a notch in the total building massing to bring sunlight in to the shared courtyard.

Units on the fifth floor are set back from the fourth floor to create private decks for residents and concentrate the building’s height towards the middle of the site, away from adjacent buildings. Most fifth floor units will include small staircases to mezzanine areas that allow access to private roof decks.

With the abundance of private patios and roof deck areas, the project well exceeds open space requirements of the Zoning Ordinance, as reflected in the table above.

The Roost @ Blake is a new mixed-use building in a mixed-use neighborhood. It creates a much-needed transition from the robust activity at Shattuck Avenue to the residential and commercial neighborhood beyond. Generous setbacks at residential floors to neighbors at the side and back provide a spatial buffer, while varying building heights provide articulation at the facades and concentrate massing away from neighbors. Commercial space at the ground floor sits adjacent to a new public parklet, and live/work spaces open to the street. The street-facing edge of the building is modulated by bays and recesses, which anchors the building in the existing streetscape. New street trees and sidewalk planting further enhance the pedestrian experience.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

### Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLEND CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLEND CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLEND
HUSTEADS COLLISION CENTER (Continued) 1000397808

CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

EMI:

Year: 1987
County Code: 1
Air Basin: SF
Facility ID: 3823
Air District Name: BA
SIC Code: 7532
Air District Name: BAY AREA AQMD
Community Health Air Pollution Info System: Not reported
Consolidated Emission Reporting Rule: Not reported
Total Organic Hydrocarbon Gases Tons/Yr: 2
Reactive Organic Gases Tons/Yr: 2
Carbon Monoxide Emissions Tons/Yr: 0
NOX - Oxides of Nitrogen Tons/Yr: 0
SOX - Oxides of Sulphur Tons/Yr: 0
Particulate Matter Tons/Yr: 0

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

PACIFIC BELL (Continued)

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

**Federal NPL site list**

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

- **Date of Government Version:** 04/26/2013
- **Date Data Arrived at EDR:** 05/09/2013
- **Date Made Active in Reports:** 07/10/2013
- **Number of Days to Update:** 62

**Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

- **Date of Government Version:** 04/26/2013
- **Date Data Arrived at EDR:** 05/09/2013
- **Date Made Active in Reports:** 07/10/2013
- **Number of Days to Update:** 62

**NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

- **Date of Government Version:** 10/15/1991
- **Date Data Arrived at EDR:** 02/02/1994
- **Date Made Active in Reports:** 03/30/1994
- **Number of Days to Update:** 56
Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013
Date Data Arrived at EDR: 05/29/2013

Federal CERCLIS NFRAP site list

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.
Federal RCRA non-CORRACTS TSD facilities list

RCRAT-SDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRACLQG: RCRA - Large Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRASQG: RCRA - Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRACESQG: RCRA - Conditionally Exempt Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.
Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 06/17/2013
Date Data Arrived at EDR: 06/21/2013
Date Made Active in Reports: 10/03/2013
Number of Days to Update: 104

Source: Environmental Protection Agency
Telephone: 703-603-0695
Last EDR Contact: 09/10/2013
Next Scheduled EDR Contact: 12/23/2013
Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 06/17/2013
Date Data Arrived at EDR: 06/21/2013

Last EDR Contact: 09/05/2013
Next Scheduled EDR Contact: 11/18/2013
Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS
ENVIROSTOR: EnviroStor Database
The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.
<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST CAL-SITES: Calsites Database</td>
<td>The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.</td>
</tr>
<tr>
<td>SCH: School Property Evaluation Program</td>
<td>This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.</td>
</tr>
<tr>
<td>TOXIC PITS: Toxic Pits Cleanup Act Sites</td>
<td>Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.</td>
</tr>
<tr>
<td>CDL: Clandestine Drug Labs</td>
<td>A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.</td>
</tr>
<tr>
<td>US HIST CDL: National Clandestine Laboratory Register</td>
<td>A listing of clandestine drug lab locations. The U.S. Department of Justice (&quot;the Department&quot;) provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.</td>

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program’s oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder’s office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills
shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from
the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings
were used as construction materials before the potential health hazards of the tailings were recognized.

FTTS: FIFRA/ TSCA Tracking System

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009
Date Data Arrived at EDR: 04/16/2009
Date Made Active in Reports: 05/11/2009

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Last EDR Contact: 09/11/2013
Next Scheduled EDR Contact: 12/23/2013
Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA
pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration
actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of
the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources
made it impossible to continue to update the information contained in the database.
RMP: Risk Management Plans
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

BRS: Biennial Reporting System
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

CA BOND EXP. PLAN: Bond Expenditure Plan
Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

NPDES: NPDES Permits Listing
A listing of NPDES permits, including stormwater.

UIC: UIC Listing
A listing of underground control injection wells.
CORTES := "Cortese" Hazardous Waste & Substances Sites List
The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

Date of Government Version: 07/05/2013
Date Data Arrived at EDR: 07/05/2013

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Financial Assurance 2: Financial Assurance Information Listing
A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.
2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data
on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This
information comes from source reports by various stationary sources of air pollution, such as electric power plants,
steel mills, factories, and universities, and provides information about the air pollutants they produce. Action,
air program, air program pollutant, and general level plant data. It is used to track emissions and compliance
data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement
matters relating to facilities with alleged violations identified as either significant or high priority. Being
on the Watch List does not mean that the facility has actually violated the law only that an investigation by
EPA or a state or local environmental agency has led those organizations to allege that an unproven violation
has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged
violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and
local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR Exclusive Records
EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be
complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the
area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily
mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through
transporters to a TSD facility.

Date of Government Version: 07/30/2013
Date Data Arrived at EDR: 08/19/2013
Date Made Active in Reports: 10/03/2013
Number of Days to Update: 45
Source: Department of Energy & Environmental Protection

Last EDR Contact: 08/19/2013
Next Scheduled EDR Contact: 12/02/2013
Data Release Frequency: Annually
Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association’s annual survey of hospitals.
Medical Centers: Provider of Services Listing  
Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000  
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes  
Source: National Institutes of Health  
Telephone: 301-594-6248  
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools  
Source: National Center for Education Statistics  
Telephone: 202-502-7300  
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools  
Source: National Center for Education Statistics  
Telephone: 202-502-7300  
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities  
Source: Department of Social Services  
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)  
Source: United States Geologic Survey  
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
GROUNDWATER FLOW DIRECTION INFORMATION
Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY
General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5’ Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
HYDROLOGIC INFORMATION
Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE
Target Property County: ALAMEDA, CA
Flood Plain Panel at Target Property: 06001C - FEMA DFRIM Flood data
Additional Panels in search area: Not Reported

HYDROGEOLOGIC INFORMATION
Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:
Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®
Search Radius: 1.000 Mile.
EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.
GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1
Soil Component Name: Tierra
Soil Surface Texture: loam
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class: Moderately well drained
Hydric Status: Not hydric
Corrosion Potential - Uncoated Steel: High
Depth to Bedrock Min: > 0 inches
Depth to Watertable Min: > 0 inches

TOPOGRAPHIC INFORMATION

USGS 7.5’ Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5’ Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5’ Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish & Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

RE: Authorization for Rhoades Planning Group to Act as Agent for 2035 Blake Street, LLC

To Whom It May Concern,

Xin Jin, managing member of 2035 Blake, LLC, hereby authorizes Mark Rhoades and/or Katie Gladstein of Rhoades Planning Group to act as agents for the property located at 2029 to 2035 Blake Street. This authorization applies to all entitlement related activities, submittals and representations.

Sincerely,

[Signature]

Xin Jin
Managing Member
2035 Blake, LLC
2343 Stuart Street
Berkeley, CA 94704

cc: Rhoades Planning Group
Overview and Project Introduction

Rhoades Planning Group is pleased to present this proposal for The Roost @ Blake, a new mixed use infill development project located at 2029-2035 Blake Street. The project will build on the character of the neighborhood, which includes mixed-use developments and commercial spaces on Shattuck Avenue and side streets, as well as a residential neighborhood to the west. The project will include ground floor commercial space, as well as three ground-floor live-work units. The upper floors will provide high-quality residential apartment units with numerous community amenities.

The project site is designated as Avenue Commercial in the City's General Plan, and fulfills the goals of the Avenue Commercial designation, which is characterized by pedestrian-oriented commercial development and multi-family residential structures. Goals within areas designated as Avenue Commercial include supporting a vibrant pedestrian-oriented area that serves residents and provides necessary goods and services. The site is zoned South Area Commercial (C-SA), and furthers the goals of the South Berkeley Area Plan including enhancement of economic development and encouragement of mixed use developments, which are more appropriate in scale and character to South Berkeley than large single use projects, and which welcome additional residents to contribute to the local commercial market (see South Berkeley Area Plan, pages 40-42).

Additionally, the project site is ½ mile (a 10 minute walk) from the Downtown Berkeley BART station, and is adjacent to a number of AC Transit bus lines, as well as City of Berkeley bicycle routes. Therefore, the project contributes to Berkeley’s Climate Action Plan goals of providing housing in locations close to goods and services, and oriented to use of public- and active-transportation, serving to reduce the City’s overall per capita carbon footprint.
Project Description

The proposed development project is a five-story mixed-use building that includes ground floor commercial retail or quick- or full-service restaurant space, intended to serve surrounding neighbors which include both residential, office, and commercial uses. The ground floor also includes three live/work spaces, which will help to activate the street and continue to encourage the diversity of uses that already exists in the neighborhood, while creating opportunities for entrepreneurship and a zero-commute lifestyle for those who are able to live, work, and fulfill basic personal and business needs in Downtown Berkeley and the South Shattuck area. The total floor area of the proposed project per Zoning Ordinance definition is 68,350 square feet.

Ground level car and bicycle parking will be provided in a garage at the rear of the lot. The project includes 72 studio, one- and two-bedroom apartments on the levels above. Shared and private open space is provided in a podium level courtyard, and on private balconies and roof decks.

The building will provide a number of amenities for residents, including significant bicycle parking, a bicycle fix-it station, and a large shared courtyard that will include a resident outdoor kitchen and dining areas, fireplace, fountain, and a dog run. A common roof deck at the fourth floor will also be available to residents.

A total of six below market rate units are required for the project consistent with the City of Berkeley Inclusionary Housing requirement (10% of market rate units @ 60% AMI), as well as an in-lieu fee for .6 of one unit.

The project provides 61 at-grade parking spaces for residents of the project, live/work tenants, and commercial employees/patrons using parking lifts. Parking will be accessed via a driveway from Blake Street at the west side of the site, and will use lifts for a total of 54 residential parking spaces, meeting the requirement of the C-SA zoning district. Residential parking spaces will be unbundled from the
apartments, meaning that residents may choose whether or not to rent a parking space. The project will also provide three parking spaces for live/work units, and five parking spaces for the commercial use, meeting all parking standards.

Additionally, the project will include 52 secure bicycle parking spaces and a bicycle fix-it station in a secured area accessible from the garage and the residential lobby. The garage driveway will be painted with bicycle sharrows striping and include exterior signage welcoming bicyclists into the garage space, in order to make bicycle transportation increasingly comfortable and attractive for residents. Further, each residential unit will be provided with two free AC Transit passes, and all parking will be unbundled from the residential units.

The project will also add three on-street parking spaces due to the removal of two existing curb cuts. The project will also use two on-street parking spaces to create a small public parklet for use by patrons of the new commercial space and live/work spaces, as well as patrons and office workers from neighboring buildings.

The project will use green building features including solar residential hot water, solar PV ready, and flow-through planters or a bio filtration area.

The project will include demolition of two existing structures currently used for commercial warehousing and storage. A total of 375 cubic yards of earth will be removed from the site to excavate for new foundations. No basement is included as part of the project.

Use Permits Requested

1. 22.12.060(UPPH) – Demolition Permit for Existing Commercial Structures.
2. 23E.52.030.A (UPPH) – Mixed Use Developments (Residential/Commercial) 5,000 sq. ft. or more
3. 23E.52.050 (UP) – Construction of gross floor area more than 3,000 sq. ft.
5. 23E.04.050 (UPPH) – Modify Yard Requirements Adjacent to a Residential Zone
6. 23E.52.030.A (AUP) – Quick/Full Service Restaurant under 5,000 sq. ft.
7. 23E.52.030.A (AUP) – Alcoholic Beverage Service of beer and wine incidental to food service
8. 23E.52.030.A (UPPH) – Live/Work Units
9. 23E.04.020 (AUP) – Rooftop Equipment

CEQA Determination

This project is expected to be exempt from CEQA pursuant to Section 15183.3: Streamlining for Infill Projects. This project meets the eligibility requirements for Infill Streamlining as follows:

- The project site is located in an urban area on a site that has previously been developed;
- The project site is located within ½ mile of a major transit corridor and satisfies the performance standards of Appendix M of the CEQA Guidelines – The project site is located within ½ mile of 5 AC Transit bus stops, including the AC Transit 18 bus line, which runs every 15 minutes during commute hours and brings passengers quickly to the Downtown Berkeley BART station. Additionally, the project is within ½ mile of the AC Transit 800 bus line, which is an all-night
transbay bus line. The project is also ½ mile from the Downtown Berkeley BART station, or an approximately 10 minute walk.

- The Project is consistent with the general use designation, density, building intensity, streetscape and applicable policies specified for the project area in the City’s Zoning Ordinance, specifically with the C-SA zoning district, and South Berkeley Area Plan and South Shattuck Strategic Plan.
- A traffic and parking study prepared for the site by Abrams Associates, included as part of this application package, shows no significant transportation or parking impacts.
- A Phase I environmental analysis prepared by International Geologic LLC, and included as part of this application package, does not indicate the need for a Phase II report, nor for any measures beyond the City of Berkeley’s generally applicable site standards.
- A Historic Resource Evaluation prepared by Preservation Architecture, and attached as part of this application package, evaluates the existing buildings against the criteria employed to determine eligibility for listing on the California Register of Historical Resources and as City of Berkeley Landmarks and Structures of Merit. The report indicates that the existing buildings are not eligible for designation on the basis of any cultural value, and are not architectural examples worth preserving as part of the neighborhood.
- The shadow studies conducted for the project show that the proposed structure will create some increased morning shading for apartment buildings to the north and west of the project site, but not to a significant degree.
- The proposed building is solar ready.

Zoning and Architectural/Building Amenity Program

The project is a five-story mixed-use building containing commercial and live/work space, residential apartment units and open-space for residents, and vehicle and bicycle parking.

The project’s ground floor includes one commercial space 2,220 square feet in size. This space is intended as a small neighborhood-serving café, based largely on interest expressed by business owners and office tenants of the building across Blake Street from the project site.

</table>
A large residential lobby is accessible from the sidewalk just west of the commercial space. The lobby provides access to the elevator and stairs, and will feature a large skylight to bring natural light to the lobby from the courtyard above. Residents will be able to walk through this lobby to access the garage, common laundry facilities, large bicycle parking room with space for 52 bicycles, as well as a bike fix-it station that allows residents to perform bike maintenance conveniently in the building.

Adjacent to the residential lobby are three individual live/work spaces ranging in size from 885 square feet to 1,318 square feet. Each live/work space will include a mezzanine, allowing tenants to maintain separation between living space and professional studio or office space.

Vehicle parking will be in a garage at grade level, at the rear portion of the lot behind the street-facing commercial, live/work, and lobby spaces. This garage will be accessible via a driveway from Blake Street at the western side of the site. Parking will use stacking lifts to provide a total of 64 parking spaces, meeting the Zoning Ordinance requirements for residential and live/work parking and slightly exceeding the requirement for commercial parking, as shown in the table below. The calculation for commercial parking assumes the commercial space will be a food-service use, and therefore assumes the most conservative parking requirement.
Additionally, the project will add three on-street parking spaces due to the removal of two existing curb cuts. The project will also proposes the use of two on-street parking spaces to create a small public parklet for use by patrons of the new commercial space and live/work spaces, as well as patrons and office workers from neighboring buildings. This results in one net new on street parking space.

The second through fifth levels of the project will support a total of 72 residential apartment units, including studio, one- and two-bedroom units. The unit mix is reflected in the adjacent table.

</tbody>
</table>

Residential units at the second floor will pull back considerably from the rear and side property lines, paying special attention to areas where existing adjacent residential structures are closest to the project site. These second floor setbacks create large private patios on the east and west edges of the podium and ground levels. The project will pull back extensively above the podium from the rear property line at the middle of the project site to create a large shared courtyard for residents. Landscaping and programming for this shared open space will include a resident cooking and dining area, fountain, and dog run, creating spaces that are available for active use by residents while protecting privacy and quietude for adjacent residents and apartment units facing into the courtyard.

At the fourth floor, the building will pull away from neighbors at the southwest and southeast corners, creating large private decks for residents. The fourth floor will also include a shared roof deck for residents near the middle of the building facing onto Blake Street. This shared space will allow all residents to enjoy views and sunlight, and will also create a notch in the total building massing to bring sunlight in to the shared courtyard.

Units on the fifth floor are set back from the fourth floor to create private decks for residents and concentrate the building’s height towards the middle of the site, away from adjacent buildings. Most fifth floor units will include small staircases to mezzanine areas that allow access to private roof decks.

With the abundance of private patios and roof deck areas, the project well exceeds open space requirements of the Zoning Ordinance, as reflected in the table above.

The Roost @ Blake is a new mixed-use building in a mixed-use neighborhood. It creates a much-needed transition from the robust activity at Shattuck Avenue to the residential and commercial neighborhood beyond. Generous setbacks at residential floors to neighbors at the side and back provide a spatial buffer, while varying building heights provide articulation at the facades and concentrate massing away from neighbors. Commercial space at the ground floor sits adjacent to a new public parklet, and live/work spaces open to the street. The street-facing edge of the building is modulated by bays and recesses, which anchors the building in the existing streetscape. New street trees and sidewalk planting further enhance the pedestrian experience.
