

Commission on the  
Status of Women

ACTION CALENDAR  
July 9, 2019

To: Honorable Mayor and Members of the City Council  
From: Commission on the Status of Women  
Submitted by: Emmaline Campbell, Chairperson, Commission on the Status of Women  
Subject: Equal Pay Independent Audit of City Employees

RECOMMENDATION

Adopt a Resolution providing \$12,500 from the General Fund to pay Dr. Martha Burk to conduct an independent audit of the pay of male and female employees in the City of Berkeley city employee workforce.

FISCAL IMPACTS OF RECOMMENDATION

\$12,500.

CURRENT SITUATION AND ITS EFFECTS

Women are consistently paid less than men in almost every occupation. The persistent disparity in pay between men and women is known as the gender wage gap. In California, women earn only 84 cents for every dollar earned by men, collectively losing over \$33.6 billion dollars each year to the gender wage gap. If the wage gap remains the same, the average woman in California could lose \$322,120 to pay inequity over the course of her lifetime. In Berkeley, the pay gap is especially high; on average, women here earn only 71 cents for every dollar earned by men.

The City has no data, report, or plan for a report on the pay gap between male and female employees employed by the City of Berkeley.

BACKGROUND

**The Equal Pay Recommendation of 2017**

The Commission on the Status of Women formed an Equal Pay Subcommittee in January 2016 based on a referral from Councilmember Worthington in 2015. The subcommittee spent 10 months developing the Equal Pay Recommendation, which was presented to City Council in April 2017.

The Commission's recommendation was the culmination of substantial work. First, the Commission completed a research phase, speaking with leaders on equal pay in Boston, San Francisco, and Albuquerque. The Commission developed a custom model for Berkeley based on the city's size and level of resources available for this program. The Commission then hosted a local business focus group session and an Equal Pay Town Hall.

As a result of this work, the Commission on the Status of Women created a three-part recommendation for City Council:

1. Direct staff to draft an ordinance related to an equal pay vendor preference for city contractors who demonstrate equal pay for male and female employees (gender based on self-identification),
2. Complete a **pay audit** on the salaries of City of Berkeley employees to investigate potential gender pay gaps within the city workforce, and
3. Develop an equal pay certification program for city contractors.

**In April 2017, the City Council unanimously passed the recommendation.**

### **After the Passage of the Recommendation**

The City Council prioritized each of the Recommendation's items as follows during the May 30, 2017 vote on the 2017 City Council Referral Prioritization Process Using Re-Weighted Range Voting:

1. Vendor Preference Ordinance - #8
2. **Audit - #2**
3. Equal Pay Certification Program - #22

The Commission on the Status of Women engaged in substantial follow-up on this recommendation. In November and December 2017, the Chair spoke extensively with City Auditor Ann-Marie Hogan, who advised that the Auditor could not fulfill this request. Ms. Hogan also spoke with Human Resources, who advised that they could not fulfill such an item.

The Chair emailed City Manager Dee Williams-Ridley in January 2018 and February 2018 and received no response or follow-up. The Chair emailed Interim Deputy City Manager Paul Buddenhagen in August 2018 and engaged in a series of back-and-forth emails with city staff over the course of two months that provided no substantive information on any progress on any of the three parts of the recommendation.

In October 2018, the Commission invited City Manager Dee Williams-Ridley to speak at its meeting. The Commission specifically requested briefing on the Equal Pay item. **Ms. Williams-Ridley stated there was no plan to ever begin the Equal Pay Audit.**

### **Moving Forward: This Subsequent Recommendation**

At this stage, it is clear that the only way to assess pay equity in the city workforce is through an independent audit. The Commission recommends contracting with Dr. Martha Burk for the audit. Dr. Burk is the unparalleled leader of the gender pay equity movement.

M/S/C (Howard/Sandoval)

Ayes: Campbell, Howard, Shanoski, Leftwich, Sandoval

Her biography is as follows:

Martha Burk is a political psychologist and women's issues expert specializing in gender pay equity, and co-founder of the Center for Advancement of Public Policy, a research and policy analysis organization in Washington, D.C. She serves as the Money Editor for Ms magazine, and she is a syndicated newspaper columnist and front-page blogger for Huffington Post and the Center for American Progress. From 2012-2015 she produced and hosted her national public radio show Equal Time with Martha Burk. Her latest book, *Your Voice, Your Vote: The Savvy Woman's Guide to Power, Politics, and the Change We Need* (2016-2018), is a Ms magazine book selection. Her work has been published in major U.S. newspapers and she has appeared on all major television networks in the United States.

From 2000-2005 Dr. Burk served as Chair of the National Council of Women's Organizations a network of over 200 national women's groups collectively representing ten million women. In that capacity she led the campaign to open Augusta National Golf Club to women, and she remains at the forefront of change for women in corporate America. She crafted the first-in-the-nation gender pay equity initiative at the state level in New Mexico in 2010 as a senior advisor to then-Governor Bill Richardson, and continues to advise business organizations and government entities at all levels on gender pay equity.

Burk is a frequent speaker on women's issues, civil society, and women's leadership. She is an active contributor to the Journalism and Women Symposium, and is a contributing speaker to SheSource, a Project of the Women's Media Center. Burk holds a Ph.D. in psychology from the University of Texas at Arlington. Her background includes experience as a university research director, management professor, and advisor to both non-government

organizations (NGOs) and political campaigns and organizations.

In addition to extensive work on domestic policy, Dr. Burk has conducted training workshops with women's NGOs internationally in Macedonia and Kuwait, under the sponsorship of USAID and the United Nations, and has conducted training in the U.S. for delegations from Russia, Botswana, Korea, Romania, Bulgaria, and the Middle East. She has recently been a member of official U.S. delegations to international conferences in Cuba, Iceland, Lithuania, Latvia, Estonia, and China. Dr. Burk has been asked by the U.S. Department of State to brief the foreign press on the U.S. presidential elections several times.

Dr. Burk has served on the Commission for Responsive Democracy, the Advisory Committee of Americans for Workplace Fairness, the Sex Equity Caucus of the National Association for the Education of Young Children, and the board of directors of the National Committee on Pay Equity. She has also served as an advisory board member to several other national organizations, including the U.S. Committee for UNIFEM, and Women for World Peace, a project of the Twenty First Century Foundation, and the PAX World Fund.

Dr. Burk has been a key part of the Commission's work on equal pay. She has advised the Commission on all previous steps of the Equal Pay Recommendation at no cost and her expertise on pay equity was essential to the Commission's work. She has previously completed a similar audit for the State of New Mexico. (Attachment 3.)

She proposes an audit that would be completed in 45 working days with the following:

- Merging of relevant databases maintained by the city since all data needed for gender pay equity comparisons across departments is not maintained in a single database.
- Gender comparison of compensation within departments, either by job title or salary grade, depending on availability and reliability of data provided by the city.
- Analysis broken out by union/non union departments and/or employees.
- Job segregation by gender, department, and job title.
- Consultation via telephone and email with City of Berkeley officials as needed.
- Possible separate analysis of part-time or hourly employees depending on data available.

See Attachment 2 for more details.

#### ENVIRONMENTAL SUSTAINABILITY

No environmental impact.

RATIONALE FOR RECOMMENDATION

The Council already decided that an audit of the city's pay gap should be conducted and is a top priority; since the City is unable to complete the audit internally, an independent audit is the only option remaining. Without an audit, the City Council cannot get valuable information about the pay gap in the city workforce and cannot remedy any inequalities.

CITY MANAGER

See companion report.

**RESOLUTION NO. ##,###-N.S.**

**INDEPENDENT GENDER PAY EQUITY AUDIT FOR CITY EMPLOYEES**

WHEREAS, the City of Berkeley Commission on the Status of Women advocates for the rights of all employees to receive pay without discrimination;

WHEREAS, women in Berkeley earn an average of 71 cents for every dollar earned by men;

WHEREAS, an audit of the pay of City of Berkeley employees is the first step to determining where pay inequities lie;

WHEREAS, the City of Berkeley City Council passed the Equal Pay Recommendation, including a requirement of a city employee pay equity audit, in April 2017;

WHEREAS, the City cannot complete the audit internally;

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Berkeley that \$12,500 will be relinquished from the General Fund to pay Dr. Martha Burk to conduct an independent audit of the pay of male and female employees in the City of Berkeley.

Proposal for Consulting Services, Martha Burk, Ph.D.

## BACKGROUND

The *City of Berkeley Commission on the Status of Women Referral Response: Gender Pay Equity* dated April 4, 2017, contains concrete recommendations that the city can implement to ensure gender pay equity in the city workforce, as well as by contractors doing business with the city. As the Referral Response points out, before contractors can reasonably be required to report pay statistics by gender, it is necessary for the City of Berkeley to analyze its own workforce in order to correct any gender disparities that may be found.

Dr. Martha Burk's unique and extensive experience can be of high value in implementing the recommendations contained in the Referral Response. She designed and directed the implementation of the first such initiative in the U.S. under New Mexico Governor Bill Richardson in 2009, which included a gender pay equity analysis of 19,811 state classified employees (final report attached) prior to designing and implementing a contractor reporting requirement.

Dr. Burk has been consulting with a number of government entities at state, county and city levels since 2010 on similar efforts in various stages of planning. She also designed the first-in-the-nation contractor reporting initiative on gender pay equity at the municipal level for the City of Albuquerque in 2015, and is currently overseeing the project on an ongoing consulting basis. Her work in this area has been presented by invitation to the EEOC, OFCCP, and the National Academy of Sciences, and featured on the U.S. Department of Labor website.

This proposal is for carrying out Referral Response Recommendation #2: City Pay Audit.

## WORK PLAN AND DELIVERABLES

The work plan assumes the timely provision of relevant documents and other records related to compensation of City of Berkeley employees by departments responsible for maintenance of such records. The work plan is further predicated on availability of key employees for consultation and answering questions that may arise in the course of the analysis.

Review and analysis includes :

Merging of relevant databases maintained by the city since all data needed for gender pay equity comparisons across departments is not maintained in a single database.

Gender comparison of compensation within departments, either by job title or salary grade, depending on availability and reliability of data provided by the city.

Analysis broken out by union/non union departments and/or employees.

Job segregation by gender, department, and job title.

Consultation via telephone and email with City of Berkeley officials as needed.

Possible separate analysis of part-time or hourly employees depending on data available.

Review and analysis will be followed by a comprehensive written report detailing the results. To ensure that the City of Berkeley goals for gender pay equity in its workforce are met with a minimum of problems, the report will include suggestions and recommendations for changes and/or enhancements along with rationale, advantages, and possible disadvantages of any recommended actions.

The report will also identify possible areas of concern, if any, regarding a smooth and successful implementation of Referral Response Recommendation #1: Contractor Bid Incentives.

#### ITEMS NOT INCLUDED

Analysis of fringe benefits  
Race/ethnicity data  
Data on employees in positions not budgeted  
Data on temporary employees  
Travel to Berkeley if needed

#### TIMELINE AND FEES

On receipt of signed agreement, consulting contract to be completed forty-five (45) working days from receipt of relevant data.

Fee: \$12,500

Travel (if required) and additional consulting by separate agreement.

#### NON- DISCLOSURE AGREEMENT

If this proposal is accepted, it will be governed by a Non-Disclosure Agreement.

## Gender Wage Gaps in the New Mexico State Classified Workforce

by

Martha Burk, Ph.D., Senior Policy Advisor on Women's Issues

September 23, 2009

Special thanks is given to State Personnel Office Director Sandra Perez, State Director of Compensation Justin Najaka, and Compensation & Classification Analyst Vanessa Readwin for providing initial data analysis and staff support for this study.

## Executive Summary

This report is an examination of gender wage gaps and job segregation affecting the classified workforce in all departments of the New Mexico state government. It is a follow up to the pilot study conducted on six departments in state government in 2008, as requested by Governor Bill Richardson and carried out by Dr. Martha Burk, Senior Policy Advisor for Women's Issues, with substantial support from the New Mexico State Personnel Office.

A plan for gathering data for the pilot study was developed over several meetings with State Personnel Office Director Sandra Perez, State Director of Compensation Justin Najaka, and State Auditor Hector Balderas and his staff. The same procedures and methodology were used in gathering and analyzing the gender wage gap data on all departments addressed in the present study.

The analysis reported herein, comparing women and men in all departments by pay band, was conducted in August, 2009. A very stringent criterion was used for defining gender wage gaps, with any discrepancy over 3% being counted as a gap.

## Conclusions

The State of New Mexico can take pride in the fact fully one third of the 396 pay bands with both women and men show no gender pay gaps, and the state is far below national averages in gender wage disparity. Some departments, such as Tax and Revenue are very close to parity, with pay gaps that are extremely small (2 pay gaps, both under 5%, out of 14 pay bands analyzed).

- Those gender wage gaps found in the New Mexico classified workforce are moderate, and much lower than national averages. Nationally, females make 77cents to the male dollar for full-time, year-round work, resulting in a gender wage gap of 23% favoring males. Of the 396 pay bands analyzed for gender pay gaps, only 15 had gaps exceeding 20%, affecting a mere 76 individuals of 19,811 in the workforce (0.003%)
- Even though "glass ceilings" are a well-documented problem nationally, the State of New Mexico should be commended for the fact that there are no apparent "glass ceilings" in the classified workforce, though a very small number of trends affecting both women and men in selected departments should be analyzed.
- While job segregation in the national workforce is a recognized factor in producing gender wage gaps, and there is a great deal of job segregation (e.g. job titles that are totally or predominately held by one gender) in a majority of New Mexico departments, such job segregation does not generally result in gender wage disparities when analyzed by pay bands. However, gender segregation in jobs is a problem for diversity and should be addressed to produce a more balanced workforce.

- Gender wage gaps were found in most departments in this study, across the majority of pay bands. Overall, the gender wage gaps favored women, in both number and size.
- In all departments, most gaps were in the very low to moderate range, with a few larger exceptions on both sides.

#### Recommendations

- Even though the clear majority of gender wage gaps are low to moderate, they should be reviewed by management and goals and timetables for remedies put in place where needed.
- Managers should be charged with annual reviews of progress toward these goals.
- The level of job segregation reflects traditional sex roles (and sex role stereotyping) in many cases, and lopsided departments do not “cancel out” one another. A diverse workforce is a goal for the State of New Mexico, and managers with sex-segregated departments are encouraged to increase their efforts at diversification.
- Technical assistance in overcoming both job segregation and gender pay gaps should be provided by the State Personnel Office, as outlined by the Governor’s Task Force on Fair and Equal Pay.
- Race and ethnicity analysis should be undertaken on at least three departments identified by the State Personnel Office and the State Auditor, to identify barriers or potential problems in incorporating race and ethnicity with future gender pay gap analyses for all departments in state government.

## Gender Wage Gaps in the New Mexico State Classified Workforce

### Background

This report is an examination of gender wage gaps and job segregation in all departments of the New Mexico state government. It is a follow up to the pilot study conducted on six departments in state government in 2008, as requested by Governor Bill Richardson, and carried out by Dr. Martha Burk, Senior Policy Advisor for Women's Issues, with substantial support from the New Mexico State Personnel Office.<sup>1</sup>

A plan for gathering data for the pilot study was developed over several meetings with State Personnel Office Director Sandra Perez, State Director of Compensation Justin Najaka, and State Auditor Hector Balderas and his staff. The same procedures and methodology were used in gathering and analyzing the gender wage gap data on all departments addressed in the present study.

It is generally agreed that any analysis of wage gaps should not only include gender but race and ethnicity, since these factors often interact. Significant problems in gathering pay data by gender, job titles, and compensation were not anticipated. However, due to past procedures for gathering data on race/ethnicity, some reaching back as far as 25 years, there was concern that existing data were not reliable enough to put forward with an appropriate degree of confidence. As part of the preliminary reporting process for the pilot study, State Personnel Director Sandra Perez, in consultation with the State Auditor, instituted a process to update both race/ethnicity data and education throughout the state classified workforce.

While all agencies were successful in obtaining the data forms and completing the verification and data entry, the data were not integrated in a way that could be used in the present study. Therefore this analysis is of gender wage gaps only, without regard to race or ethnicity. The recommendations contained in the report to the Governor's Task Force on Fair and Equal Pay (Executive Order 2009-004) will include developing an appropriate methodology for including race and ethnicity data in future reports.

### Methodology and Results

#### Job Segregation

Job segregation was measured by a simple count of number of females and number of males in each department. Departments with more than 60% of one gender are considered segregated by gender. Job segregation is of less concern as department size decreases, since many pay bands may include only one individual in small departments. Accordingly, data are reported separately

---

<sup>1</sup>Burk, Martha. "Gender Pay Gaps in Six Selected Departments in the New Mexico State Government," November, 2008. <http://www.governor.state.nm.us/htdocs/Pay%20Equity%20Report%20January%202009.pdf>

for departments with more than 50 employees and those with 50 or fewer employees. A summary table can be found in Appendix I.

Thirty-five departments have more than 50 employees, ranging from a low of 53 (Homeland Security & Emergency Management) to a high of 3692 (Department of Health). Sixteen departments (46%) are female dominated, six (17%) are male dominated, and twelve (35%) show no gender segregation according to the criterion used.<sup>2</sup> In the departments with more than 50 employees, the greatest job segregation was found in Game and Fish, with 83.78% males, and Human Services, with 81.79% females.

Thirty departments have fewer than 50 employees, ranging from a low of 2 (Juvenile Parole Board, Architectural Examiners Board, Border Development) to a high of 45 (Educational Retirement Board). Twenty departments (66%) are female dominated, two (6%) are male dominated, and four (13%) show no gender segregation according to the criterion used. The two departments that show male dominance are below 67% male, while a number of the female dominated departments fall in the 70-85% range. Four departments (all boards) are 100% female, though three of these have only two members. A greater concern is the New Mexico Medical Board, which has 10 women and no men.

While this level of job segregation reflects traditional sex roles (and sex role stereotyping) in many cases, it does not mean that one lopsided department is “canceled out” by another. Managers with highly sex-segregated departments are encouraged to increase their efforts at diversification.

### Gender Wage Gaps

Various measures have been employed for determining whether a given wage gap between groups (e.g. men and women) is significant. Factors include such variables as number of employees in a given classification, width of pay bands, experience, and turnover. Experts agree that gender wage gaps are expected to be smaller for public employers than for private corporations, because better safeguards (such as the Hay Guide-Chart Profile Method of Job Evaluation system used in New Mexico) are more often in place to minimize disparities due to factors not directly related to qualifications and performance. Accordingly, for purposes of this analysis, wage averages with differentials of less than 3% were treated as equal. Obviously as differentials increase, the seriousness of a given disparity increases (e.g. a gender wage gap of 3% is of much less concern than a gap of 30%).

The assumption built into the Hay system used in New Mexico to determine pay bands for different jobs is that the system captures experience, skill, effort, responsibility and working conditions to produce a pay band for a given job. These are "measured" though three quantifiable, job-related compensable factors; Know-How, Problem-Solving and Accountability.

---

<sup>2</sup>Numbers do not add to 100% due to rounding error.

A fourth compensable factor of Additional Compensable Elements and Accountability may be used to measure areas such as physical effort, environment, hazards or sensory attention. Job content points for each job correlate to a particular pay band. This means that all jobs in a pay band in a given department can be compared on these variables, and an evaluation can be made as to whether gender pay gaps exist in a given pay band with dissimilar but equally rated jobs. All pay bands have a range, and pay band mid-points are included in this report for reference.

Due to uneven numbers of males and females in job categories, an overall “average pay gap” is not meaningful, so is not reported. (e.g. If overall the gender pay gap favors males in half the jobs and females in half, and the gaps are roughly equal in percentage, the average will be close to zero. This indicates there are no gender pay gaps, when in fact there could be substantial ones on both sides.)

Given that the work force is substantially segregated by job title in many departments, resulting in substantial numbers of job titles that would by necessity be left out of a job title analysis, a pay band analysis was used. Virtually all employees can be included in a pay band analysis in all but the smallest departments.

In the pay band analyses, all employees in a given pay band in a department were grouped, regardless of job title. For example, in the Department of Transportation, Training and Development Specialist-O, which is pay band 60, was grouped with Budget Analyst-O, which is also pay band 60, but a dissimilar job title. This grouping produces an analysis of gender wage gaps according to pay bands, giving a clearer picture of gender wage gaps at a given level of compensation overall.

### Results

A total 615 pay bands in 65 departments were analyzed for gender pay gaps. Two hundred and nineteen of these were gender segregated (90% of gender segregated pay bands had 3 or fewer employees, most with only one worker), so no gender comparison was possible.

Pay Bands Examined	615
Pay Bands Segregated by Gender	219 (over 90% of these contained 3 or fewer people)
Bands containing both genders	396
No gender wage gap	129
Gender wage gap	267
Gap favors females	141
Gap favors males	126

Complete charts showing gender wage gaps by pay band by department are included in Appendix II of this report. Positive numbers indicate gender wage gaps favoring males, and negative numbers indicate gender wage gaps favoring females.

While this report and the discussion below includes all pay bands with at least one female and one male, caution must be used in comparing pay by gender when the number of individuals is extremely low. However, even if too low to draw conclusions about systemic problems, gender wage gap numbers in pay bands with few employees can still be indicative. For example, in the Educational Retirement Board, there are 5 pay bands where fewer than five individuals are employed.. In 4 of the 5 cases, the gender pay gap favors females, but in the one case favoring the male, the gap is substantially greater than those favoring females. It is recommended that management in all departments review such cases to determine whether remedial action is warranted.

As in the pilot study of six departments in 2008, gender pay gaps are scattered throughout all departments, though fully one third of the 396 pay bands with both women and men show no gender pay gaps. Some departments, such as Tax and Revenue are very close to parity, with pay gaps that are extremely small (2 pay gaps, both under 5%, out of 14 pay bands analyzed).

By far the majority of pay gaps in the New Mexico State classified workforce are moderate in size and do not approach the national average of 22% (though a very few appear to be much higher than expected). Of the 396 pay bands analyzed for gender pay gaps, only 15 had gaps exceeding 20%, affecting a mere 76 individuals of 19,811 in the workforce (0.003%).

Slightly more (52%) of the pay gaps favor women , and with a few notable exceptions, the pay gaps favoring women are generally of a greater magnitude than those favoring men.

It is tempting to review the results of this study and conclude that the gender wage gaps “even out.” For example, the gender wage gap in pay band 35 in the General Services Department favors females by 6.58%, and the gender wage gap in pay band 50 favors females by 6.27%. Viewing gender wage gaps as virtually equal and therefore canceling out is illogical and does nothing to remedy inequities for individuals or groups of workers on the wrong side of any given gap. (The old saying two wrongs don’t make a right applies here.) Every gender wage gap is a problem, and remedial steps should be taken, regardless of whether there is a countervailing gap on the other side.

Dismissing gender wage gaps as insignificant because they appear small or do not reach the level of national averages is also a disservice to employees. The gender wage gap of only 3.48% in pay band 70 in the Public Defender’s department translates to a shortfall of \$700 over a year’s time. Larger pay inequities produce larger losses for workers. The 6.93% gender wage gap in pay band 85 that is found in Aging and Long Term Services translates to \$5096 a year, and the 10.43% gap in this pay band in Transportation means a yearly loss of \$7155. It is doubtful that the workers disadvantaged by these gender pay gaps would view them as insignificant.

### Glass Ceiling

Departments were also analyzed for “glass ceilings,” meaning either women or men are concentrated in lower paying jobs and their ranks thin as the pay band increases.

There does not appear to be a “glass ceiling” in the New Mexico system, as women and men are found in most paybands throughout the system. However, some trends should be examined. In the Department of Finance and Administration, all of the pay gaps in the lower levels favor women, and all of the gaps at higher levels favor men, though by smaller amounts. In both the State Treasurer’s office and Game and Fish, the pay gaps favor men in every pay band except one. The large majority of pay gaps in Military Affairs and the Department of Transportation favor women, even though these workforces are heavily male dominated. There are nine men and no women at the highest level in Transportation. The lowest pay band in Aging and Long Term Services has 19 women and no men. Management is encouraged to review these results.

### Conclusions

The State of New Mexico can take pride in the fact fully one third of the 396 pay bands with both women and men show no gender pay gaps, and the state is far below national averages in gender wage disparity. Some departments are very close to parity, with pay gaps that are extremely small.

- Those gender wage gaps found in the New Mexico classified workforce are moderate, and much lower than national averages. Nationally, females make 77cents to the male dollar for full-time, year-round work, resulting in a gender wage gap of 23% favoring males. Of the 396 pay bands analyzed for gender pay gaps, only 15 had gaps exceeding 20%, affecting a mere 76 individuals of 19,811 in the workforce (0.003%).
- Even though “glass ceilings” are a well-documented problem nationally, the State of New Mexico should be commended for the fact that there are no apparent “glass ceilings” in the classified workforce, though a very small number of trends affecting both women and men in selected departments should be analyzed.
- While job segregation in the national workforce is a recognized factor in producing gender wage gaps, and there is a great deal of job segregation (e.g. job titles that are totally or predominately held by one gender) in a majority of New Mexico departments, such job segregation does not generally result in gender wage disparities when analyzed by pay bands. However, gender segregation in jobs is a problem for diversity and should be addressed to produce a more balanced workforce.
- Gender wage gaps were found in most departments in this study, across the majority of pay bands. Overall, the gender wage gaps favored women, in both number and size.
- In all departments, most gaps were in the very low to moderate range, with a few larger exceptions on both sides.

### **Recommendations**

- Even though the clear majority of gender wage gaps are low to moderate, they should be reviewed by management and goals and timetables for remedies put in place where needed.
- Managers should be charged with annual reviews of progress toward these goals.
- The level of job segregation reflects traditional sex roles (and sex role stereotyping) in many cases, and lopsided departments do not “cancel out” one another. A diverse workforce is a goal for the State of New Mexico, and managers with sex-segregated departments are encouraged to increase their efforts at diversification.
- Technical assistance in overcoming both job segregation and gender pay gaps should be provided by the State Personnel Office, as outlined by the Governor’s Task Force on Fair and Equal Pay.
- Race and ethnicity analysis should be undertaken on at least three departments identified by the State Personnel Office and the State Auditor, to identify barriers or potential problems in incorporating race and ethnicity with future gender pay gap analyses for all departments in state government.

Appendix I

Gender Pay Gaps in the New Mexico State Workforce by Department

Business Name	Business Unit	Salary Grade	Midpoint / Hourly	No. Females	Female Avg	No. Males	Male Avg	Gap (Male-Female)	%Gap /Male
State Auditor	30800	40	\$12.37	1	\$15.35	0	\$0.00	(\$15.35)	
	30800	60	\$18.47	3	\$17.38	1	\$20.54	\$3.15	15.35%
	30800	65	\$20.40	3	\$22.11	3	\$21.72	(\$0.39)	-1.80%
	30800	70	\$22.74	1	\$28.33	0	\$0.00	(\$28.33)	
	30800	75	\$25.50	1	\$29.33	0	\$0.00	(\$29.33)	
	30800	85	\$32.70	3	\$28.28	2	\$31.12	\$2.84	9.14%
	30800	90	\$37.35	1	\$37.74	5	\$36.82	(\$0.92)	-2.51%
