

# Hypoglycemia

# Criteria for Assisting with oral Glucose

- ▶ Patient with ALOC
- ▶ History of Diabetes
- ▶ Suspect HYPO-glycemia
- ▶ Patient is able to eat on their own, i.e. they won't choke on the glucose
  - ▶ If you're not sure HYPO vs HYPER, giving glucose is still recommended. If they're HYPO it will help a lot, if they're HYPER it won't hurt very much

# Narcan Nasal Spray – Done!
