Re: Impact Test Results – ASFU Gilman Street Fields

Dear Doug,

On September 24th I conducted impact attenuation tests on the two synthetic turf soccer fields at ASFU's Gilman Street complex in Berkeley, CA. The tests were conducted in accordance with ASTM test method F355-A and test specification F1936-10. Section 8.3 of test specification F1936-10 was used to select test point locations. Detailed test results are attached.

The test results reported herein reflect the performance of the points tested, at the time of testing and at the temperatures reported. As recorded in the attached results, **test points #1 and #9 on the north field, and test points #1, #7, and #9 on the south field, failed to meet ASTM's requirement of <200 average g-max**, when tested in accordance with the above listed method and specification. (It should be noted that these results do not imply that an impact-related injury cannot occur if the surface systems comply with ASTM's g-max requirement.)

Thank you for the opportunity to be of service. Please call if you have questions or would like additional copies of the report.

Sincerely,

A handwritten signature in black ink, appearing to read "Parker Wood".

Parker Wood

Test Site Diagram (2)

Impact Test Data

Field Location: ASFU - Gilman Street Fields - North Field
Date(s) of Test: 9/24/2012

Field Description and Condition:

Field Layout: Soccer and lacrosse
 Surface Type: Infilled synthetic turf
 Manufacturer: FieldTurf USA
 Date Installed: August, 2008
 Condition: Mostly clean; dry
 Orientation: End A is NNW

Test Method/Specification: ASTM F1936-10

Standard Specification for Impact Attenuation of Turf Playing Systems as Measured in the Field

Weather Conditions

General: Overcast; light breeze
 Temp. (F): 62 °F (avg.)
 Humidity: 75% Relative

Summary of Test Results

Location	Vo (m/s)	h (m)	Avg g-max	SI	HIC	Temperatures				Depths		
						Air (°C)	Air (°F)	Turf (°C)	Turf (°F)	Pile (mm)	Infill (mm)	Turf (mm)
Test Point 1	3.47	0.61	211	884.2	764.0	16	61	22	72	32	17	15
Test Point 2	3.46	0.61	184	740.4	636.9	16	61	22	72	37	27	10
Test Point 3	3.48	0.62	156	587.6	505.5	17	63	22	72	42	30	12
Test Point 4	3.46	0.61	154	570.4	492.5	17	63	22	72	36	29	7
Test Point 5	3.48	0.62	154	580.9	500.4	16	61	22	72	44	35	9
Test Point 6	3.47	0.61	195	785.2	674.3	16	61	23	73	32	24	8
Test Point 7	3.45	0.61	191	758.6	652.3	17	63	24	75	40	30	10
Test Point 8	3.46	0.61	181	701.4	604.0	17	63	22	72	43	33	10
Test Point 9	3.46	0.61	228	955.5	819.8	17	63	23	73	24	17	7
Test Point 10	3.46	0.61	195	797.9	685.2	17	63	23	73	33	25	8

Range of g-max averages:

Highest average reading	228
Lowest average reading	154
Average of the averages	185

Exceptions / Comments:

Section 8.3 of ASTM Specification F1936-10 was used to select test point locations. No site abnormalities were noted, and there were no deviations from standard test procedures. All tests met data integrity requirements. The penalty kick lines have been replaced at both ends of the main field. A small soccer field runs from side to side on each half of the main field. Significant fibrillation and shedding are evident. Infill is showing on the surface of the field in many areas. The turf is matted down in many spots. There was lots of loose fiber on the surface of the field. A small bare spot was noted. No seam problems were observed.

Job Number: 11-065a

Client: ASFU

Field: Gilman Street Fields – North Field

Date Tested: 9/24/2012

Test Points:

- Point 1 – Penalty kick line, end A, center of field
- Point 2 – Corner of penalty box between end A and mid-field line, closest to sideline C
- Point 3 - 75' from mid-field line to end A, 40' from center of field to sideline C
- Point 4 – Mid-field line, center of field
- Point 5 – 75' from mid-field line to end B, 63' from center of field to sideline D
- Point 6 – Half way from restraining arc to edge of penalty box at end B, center of field
- Point 7 – 50' from mid-field line to end B, 5' outside sideline C
- Point 8 – Corner of the field at end A and sideline D
- Point 9 – 3' from goal line to mid-field line, end A, center of field
- Point 10 – 15' from goal line to mid-field line, end B, center of field

Note: Not to scale. Lacrosse lines and smaller soccer fields not shown.
