## GREEN INFRASTRUCTURE PLAN MEETING

Come out to Live Oak Community Center from 6:30-8 pm on February 27th and learn more about the upcoming Green Infrastructure Plan and opportunities for input. The Green Infrastructure Plan will be a dynamic planning document containing goals for future green streets retrofits to better clean stormwater runoff to the Bay. Additionally, the plan will contain prioritization tools and guidelines for incorporating green infrastructure into future planning documents and capital projects.

Wednesday February 27  
6:30-8:00 pm  
Live Oak Community Center  
Fireside Room  
1301 Shattuck Avenue

## NEW WELCOME SIGNS

As you're driving around, you might notice some new signs. These signs replace a variety of existing welcome signs and are being installed at 12 locations around entry points to the city. The new signs state, "Welcome to the City of Berkeley, Ohlone Territory, Population 112,580" and prominently display the City logo.

## SUCCESSFUL ELECTRIFICATION EXPO

Last week, Berkeley's Office of Energy & Sustainable Development co-hosted a major event to educate contractors, homeowners and other community members about ways to transition from natural gas in homes and businesses by electrifying everything: heating, water heating, stoves, and cars. Several hundred community members attended and many vendors and experts were on-hand to provide demonstrations of electric heat pump water heaters and other devices.
