

**Public Works
Engineering**

A dimensioned schematic must be completed with this application.

Special Notes:

Trenchless technology cannot eliminate sags in the pipeline. Contractor is responsible for the line and grade, and shall inform owner if trenchless piping is not suitable for the site-specific application. The City of Berkeley prohibits trenchless installation on sewers with less than 1% slope.

Only a C-36, C-42, and Class A General Engineering licensed person may obtain Private Sewer Lateral Permits.
