

Measure T1 Bond Update

CITY-WIDE IRRIGATION SYSTEM

PROJECT DESCRIPTION

There are approximately 80 irrigation controllers throughout Berkeley that the City operates to water and maintain our parks, fields and medians. Currently, each controller is individually programmed, monitored daily by City staff, and adjusted depending upon anticipated weather conditions. The new computer-based irrigation system will help the City to effectively manage water across Berkeley's irrigation systems in a centralized location, which will conserve water and control costs.

PROJECT UPDATE

July 2019

60 of the 80 irrigation controllers have been installed.

PROJECT TEAM

City of Berkeley's Project Manager: Bruce Pratt,
BPratt@CityofBerkeley.info

Contractor: Heritage Custom Landscapes Inc.

NEXT STEPS

- Full implementation anticipated by the end of August 2019.

FUNDING

- **Measure T1:** \$531,507
