Uploaded photos electronically at: <https://www.dropbox.com/request/TEHwD691w5MpR4Q0vD6t>

Please refer to the FEMA Photography Instructions handout on the program website for more information.

RETROFIT SCOPE OF WORK

Provide a short description of the proposed scope of work, if known. *Attach additional pages if necessary.*

I already have a retrofit design and will provide electronic copies of these plans.

Do you expect the proposed project to result in any changes visible from the exterior of the building?

Yes No I do not know

ACKNOWLEDGEMENT

- I have read and understood the *Retrofit Grants Program Rules (2018)*, including the program eligibility requirements and the need to seek multiple bids for design and construction.
- I understand the City has obtained a limited amount of funding from FEMA and that submitting an Application for the program does not mean I will receive a Design Grant or Construction Grant.
- I understand that if my project is selected for the program, FEMA must review and approve my proposed design before I become eligible for a Construction Grant, and that if I begin construction prior to FEMA approval I will lose that eligibility.
- I understand my retrofit project must be designed to meet or exceed the program technical guidelines applicable to my building type.
- I understand Design and Construction Grants may only be used to reimburse payments made to licensed design professionals and contractors are not available for amounts paid in cash or for permitting fees. I commit to paying the portion of design and construction costs not covered by grant funding.
