

Memorandum

To: Aaron Sage, Senior Planner
From: Mark Rhoades, Rhoades Planning Group
Date: December 22, 2014
Re: Green Building Checklists for 2211 Harold Way

Dear Aaron,

Please find attached drafts of both the LEED ND and GreenPoint checklists. Both of these are initial, with room to strive for additional points. Both are well into the Gold territory.

We have worked through the checklists for both LEED ND and GreenPoint Rated. We are early enough in our design process that we are still unable to determine the full range of points we will qualify for under either system, but we have found more than enough points that we are sure of to achieve Gold under both systems. Looking at green building issues early in the process is a best practice in itself, so we think we are right where we should be.

Under LEED ND, issues we are still looking at include building water efficiency, sustainable landscaping, clear glass for all street facing uses, bicycle network and storage.

Many of the same issues offer potential under Green Point Rated too. In addition, GreenPoint rated offers points for a range of interior issues such as the choice of interior finishes, counter tops, flooring, cabinet box, shelving and trim material. We will be looking at all of these issues, but just haven't gotten far enough along in our planning yet to do so.

The exercise of looking at both LEED ND and GreenPoint rated has been illuminating for us and is something we might recommend others consider for an exercise, even if they don't actually certify under both systems.

We look forward to discussing with you, and updating our analysis as we continue to progress in our project design.

Sincerely,

Mark Rhoades, AICP

NEW HOME RATING SYSTEM, VERSION 6.0

MULTIFAMILY CHECKLIST

Total Points Targeted: 125

Certification Level: Gold

The GreenPoint Rated checklist tracks green features incorporated into the home. GreenPoint Rated is administered by Build It Green, a non-profit whose mission is to promote healthy, energy and resource efficient buildings in California. The minimum requirements of GreenPoint Rated are: verification of 50 or more points; Earn the following minimum points per category: Community (2) Energy (25), Indoor Air Quality/Health (6), Resources (6), and Water (8); and meet the prerequisites CALGreen Mandatory, E5.2, H6.1, J5.1, O1, O7.

The criteria for the green building practices listed below are described in the GreenPoint Rated Single Family Rating Manual. For more information please visit www.builditgreen.org/greenpointrated
Build It Green is not a code enforcement agency.

A home is only GreenPoint Rated if all features are verified by a Certified GreenPoint Rater through Build It Green. This is the public version of the Checklist and cannot be used for certification.
