

Design Tools and Guidelines

Prepared for

CITY OF BERKELEY

Planning and Development Department
Advance Planning Division

WILBUR SMITH ASSOCIATES
2M ASSOCIATES
HPV TRANSPORTATION CONSULTING

April 2000

Approved by City Council on April 4, 2000

Resolution No. 60,503-N.S.

City Council

Shirley Dean, Mayor

Council members

Linda Maio, District 1

Margaret Breland, District 2

Maudelle Shirek, District 3

Dona Spring, District 4

Diane Woolley, District 5

Betty Olds, District 6

Kriss Worthington, District 7

Polly Armstrong, District 8

Transportation Commission

Robert Thomason, Chair

Suzanne Adams

Charlie Betcher

Michael Farrell

Fran Haselsteiner

Carl Jaramillo

Jim Orjala*

Hank Resnik*

Stephen Wheeler*

* Members of the Commission's Bicycle Subcommittee

Planning and Development Department Staff

Wendy Cosin, *Acting Planning Director*

Karen Haney-Owens, *Advance Planning Manager*

Rochelle Wheeler, *Project Manager*

TABLE OF CONTENTS

CHAPTER

1 Introduction	1-1
Background	1-1
Report Overview	1-1
Development of Report.....	1-2
Purpose of a Bicycle Boulevard.....	1-2
Goals and Objectives	1-3
Selection of Streets for Bicycle Boulevards	1-3
Benefits of Bicycle Boulevards.....	1-4
2 Existing Conditions	2-1
Consultant Field Review.....	2-1
Bowditch/Hillegass Bike Boulevard	2-1
California/King Bike Boulevard	2-2
Channing Way Bike Boulevard.....	2-3
Milvia Bike Boulevard.....	2-4
Ninth Street Bike Boulevard.....	2-5
Russell Street Bike Boulevard.....	2-6
Virginia Street Bike Boulevard.....	2-7
Additional Bicycle Boulevard Issues Identified by the Public	2-8
3 Issues Summary	3-1
4 Toolbox and Sample Bike Boulevard Layout	4-1
Overview.....	4-1
Design Guidelines.....	4-4
5 Review of Impacts of Traffic Calming Devices	5-1
Impacts on Speed.....	5-1
Impacts on Volume	5-2
Impacts on Collision Rates	5-3

6 Preliminary Implementation Plan	6-1
Overview	6-1
Implementation Approach	6-1
Priority Recommendations	6-2
Recommended Phasing Plan.....	6-3
Outstanding Issues Raised by the Public.....	6-6
Coordination with Other Projects	6-6
Maintenance of Bicycle Boulevards	6-8
Monitoring Phase	6-8

ILLUSTRATIONS

Figure	Follows
1 Recommended Bikeway Network.....	1-1
2 Bowditch/Hillegass Bicycle Boulevard: Existing Conditions	2-2
3 California Street Bicycle Boulevard: Existing Conditions	2-3
4 Channing Way Bicycle Boulevard: Existing Conditions	2-4
5 Milvia Street Bicycle Boulevard: Existing Conditions	2-5
6 Ninth Street Bicycle Boulevard: Existing Conditions	2-6
7 Russell Street Bicycle Boulevard: Existing Conditions	2-7
8 Virginia Street Bicycle Boulevard: Existing Conditions	2-8
9 Typical Treatment – 36’ Wide Street – No Bike Lanes.....	4-2
10 Typical Treatment – 36’ Wide Street – Existing Bike Lanes	4-2
11 Typical Treatment – 48’ Wide Street – Existing Bike Lanes	4-2
12 Typical Treatment – 48’ Wide Street – Expanded Planting Strip.....	4-2
13 Typical Treatment – 48’ Wide Street – Median Island	4-2

TABULATIONS

Table	
1-1 Bicycle Counts on Byrant Street Before and After Bicycle Boulevard.....	1-5
1-2 Bicycle Counts on Byrant Street Bicycle Boulevard Extension.....	1-6
1-3 Bicycle Counts on Milvia Slow Street.....	1-6
4-1 General Issues to Address During Bicycle Boulevard Implementation.....	4-1
4-2 Toolbox Summary.....	4-3
5-1 85 th -Percentile Speed Impacts Downstream of Traffic Calming Measures.....	5-2
5-2 Motor Vehicle Traffic Volume: Impacts of Traffic Calming Measures.....	5-2
5-3 Average Annual Collision Frequency: Impacts of Traffic Calming Measures.....	5-3
6-1 Scheduled Repaving Program	6-4
6-2 Recommended Five Year Phasing Plan.....	6-5

Appendices (available upon request)

- A. Sample Bicycle Boulevard Layout for Several Blocks (Drawing)
- B. Summary of Public Comment from Fall 1999 Bicycle Boulevard Workshops
